LOVELY PROFESSIONAL UNIVERSITY

THE USUAL GRADUATION pictures did not flood my inbox this year. Of late, even playschools have been holding ceremonies, complete with scrolls and gowns. Friends and family would proudly send me photos of the young graduates in mortarboards, gowns and big smiles. Then there is the usual flurry of congratulatory phone calls and messages.

But with most institutions holding their ceremonies online, this rite of passage seems to have lost its sheen. The end of the last academic year was chopped off rather brutally, and I feel for all those young women and men. The microscopic villain ate up those final opportunities to bid farewell to friends and favourite haunts on and outside campuses. Opportunities that will never come back.

This annual special issue on India's best colleges comes at the start of an academic year like no other. While many other things—like going to a place of worship, shopping and travelling—can be optional, education cannot be. So, we have focused on how top colleges have focused on transcending the pandemic-induced crisis to reach out to their students. The solutions have been a mix of heart and tech.

While lecturers from Lady Shri Ram College for Women, Delhi, are walking the extra mile by coaching individual students over the phone, Loyola College, Chennai, has opened an emergency desk to assist students and faculty with everything from academic needs to sourcing food and medicines.

Not surprisingly, IIT Bombay's education technology department is working on streamlining the inhouse process. Hansraj College, Delhi, crowdsourced ideas to zero in on a platform that was best suited for their needs, and if that is not democracy in action, tell me what is! Knowing Mumbai's bumper-to-bumper traffic, I am not surprised that St Xavier's College is seeing a great opportunity in remote classes—an opening to bring in guest faculty. So, yes, India's best colleges are bouncing back in their own way, and that is why they have been topping our list consistently.

So, young reader, take a deep breath, steel your spine, look in the mirror and say, "This, too, shall pass!" It will, trust me. If you do not, trust Prof John Varghese, principal of St Stephen's College, Delhi. He said this about his students, "They are smarter, more technically savvy and, what hits me in the face is that they are so focused. At their age, I don't think I had this much clarity on what I wanted to do with my life." This from a man who has spent more than two decades in academia.

Once I had shared in this space my bond with an old college friend called KLD. A Lambretta scooter I inherited from my brother, when I joined St Stephen's. By the time I left Delhi, KLD and I had clocked a few thousand miles together, all over northern India. When I savour memories of college life, KLD is always lurking in the background. So, young reader, I can understand quite well the angst you feel, bound to a screen and away from friends. As I said, this, too, shall pass.

Count your blessings. Believe. Be strong. Hold your loved ones close. And, persevere. I wish you the best of everything that life brings.

Philip Mathew

Time will tell

The inability of the Congress to look beyond the Gandhi family is not new. While Rahul Gandhi has metamorphosed into a new avatar, it remains to be seen whether his belligerence will transform the party into a fighting outfit—if he were to assume the post of president again ('Rites of return', August 16).

C.V. Aravind,
On email.

The Congress continues to suffer from organisational weaknesses, ideological flux and its own inner demons. No matter how much the party focuses on Rahul's return, the same cannot be fruitful without a concomitant shake-up in the party organisation.

Vijai Pant,
On email.

Easy to understand

Bibek Debroy's Last Word (August 16) was a wonderful write-up, made so simple for a layman. Economics jargon are Greek to many. But Debroy's explanations on recession were simple.

P.M. Gopalan,
On email.

Collector's issue

R. Prasannan has packed a great deal of information on the heroic contribution by Indian soldiers in the Allies winning World War II, and the various ramifications thereof ('We were there, everywhere', August 2). The scale of participation and valour of Indian soldiers was a revelation. This issue was a collector's issue.

C.P. Bellappa,
Coorg, Karnataka.

Error

In the photo caption that went with 'Rendezvous with Ram' (August 16), the name of Chief Minister Yogi Adityanath was erroneously mentioned. The error is regretted.

No easy answers

The Central and state governments are faced with the difficult decision of unlocking schools and colleges in the country. It is much tougher than deciding on reopening metro train services or cinema theatres or allowing religious, social and political gatherings. While going to cinemas or marriages is optional and occasional, attending schools and colleges is a compulsory and daily activity.

In many western countries, there are demands to reopen schools and some countries have allowed children to return to schools, but in India, states are unwilling to open schools for a variety of reasons. The Central government itself runs thousands of schools, colleges and universities, all of which have far more space per student than schools run by state governments, municipal councils and panchayat bodies.

On the other hand, there is concern about keeping tens of millions of students at home for long periods. Even though online classes are encouraged, their reach is not more than 60 per cent compared with regular classes. There is not enough wireless connectivity in rural and urban slums. Political parties and activist groups have pointed out that children from families with economic and social disadvantages lack access due to affordability and infrastructure reasons.

The hope that there would only be a deferment of three to four months in the 2020-21 academic season seems to be misplaced. The worsening pandemic situation across the country has made administrators more cautious and the plan to restart classes in September has been deferred. Some even want the government to wait till a vaccine is developed and administered to the population.

Private school teachers are facing another jeopardy. They are worried about the cascading effects of the long closure of schools, as parents plan to

pull out their wards or stop paying fees, which could result in job losses. Parents feel the pressure of children remaining at home, missing competitive learning, sports and extracurricular activities. Obesity and other health issues develop quickly in children who spend more time using computers and watching television.

The Supreme Court has, meanwhile, raised the question whether the country can afford to wait to reopen its educational institutions till a vaccine is ready. The court made the observation while green-lighting entrance examinations for engineering and other professional courses, with strict observance of Covid-19 protocols.

Despite the efforts to spread digital links to villages and slums, a good percentage of the population is either not connected digitally or is constrained by economic handicap. According to one estimate, nearly one crore students are not able to access online

classes, and many rural school teachers are not able to connect with their students.

There are touching anecdotes of conscientious teachers going to homes without connectivity to teach children so that they do not miss out on crucial lessons. As education departments across the country try to restart classes with safety measures, the first problem they confront is that of space. Classes with reduced capacity will have to be held in shifts or alternate dates.

The second problem pertains to hygiene as maintenance of toilets and canteens—where they exist—is not up to new requirements. Finally, although children seem to be less affected by Covid-19 than other age groups, regular travel to schools poses a risk. Reopening of educational institutions, therefore, remains a knotty question, as decision-makers wonder whether it is better to be safe than sorry.

॥ वसुधैव कुटुम्बकम् ॥

SYMBIOSIS MEDICAL COLLEGE FOR WOMEN (SMCW)

Gram: Lavale, Tal.: Mulshi, Dist.: Pune - 412 115, Maharashtra

Bringing Indian women to the forefront of Medicine

Inspired by the first lady physician of India, Dr. Anandi Gopal Joshi

In its golden jubilee year, Symbiosis launches the Symbiosis Medical College for Women to empower the next generation of women doctors.

With the objective of empowering women and contributing to the requirement of women in the medical profession (only 17% of allopathic doctors are women*), Symbiosis has established a medical college exclusively for women. The college will have a strong focus on academics and research. Symbiosis University Hospital and Research Centre (SUHRC) is the hospital attached to the medical college and has state-of-the-art infrastructure, latest equipment and technology.

Symbiosis Medical College for Women (SMCW) will not only produce skilled medical professionals but women doctors who are empathetic, ethical and compassionate. This college is a tribute to the first lady physician of India - Dr. Anandi Gopal Joshi.

Turbans and tailor-made tales

The fans of neither of them would approve of this, but I am finding more in common between Jawaharlal Nehru and Narendra Modi. As this column discussed three fortnights ago, both have been practitioners of personal diplomacy. Here's another. They share a love for good clothes.

Though his mentor wore only a loin cloth and was called a half-naked fakir by Winston Churchill, Nehru loved to dress well. When fellow Congressmen faulted him for wearing a suit to Europe in the 1930s, he told them to imbibe Gandhian values and not imitate Gandhi's garments.

Nehru looked dapper in his achkan with a rose in the buttonhole. In summer he wore a jacket to which he lent his name. Modi has cut it to his size and stuck his label; now it is called Modi jacket. Nothing wrong. Rulers should draw strength, sustenance and style from their predecessors.

Though Gandhi lent his name to the khadi Congress cap, Nehru made it a politician's trademark headgear. The association between neta jis and the khadi cap peaked during the Morarji Desai era, but it began to vanish from political pates in the Rajiv era. Probably, Rajiv's outburst at the Bombay AICC centenary against power-brokers gave it the knockout punch. New-gen netas dumped it into the dustbins of history and confines of pocket cartoons. Today it is worn mainly by Congress Seva Dal volunteers in white khadi, Rashtriya Swayam-sevaks in black woollen, Maharashtrian elders in general and Anna Hazare in particular.

Dressing well seems to have been a family trait with the Nehrus. Motilal was quite a dandy; Indira and Rajiv dressed appropriately. She looked the Bharatiya *naari* with her sari over the head on political occasions in India, but charmed world leaders in sleeveless blouse and dapper hairdo when abroad. Rajiv proved that the heavens wouldn't fall

if an Indian PM wore a western suit or jeans and t-shirt. He wore kurta-pyjamas while politicking, bandhgallas while banqueting with statesmen, suit and tie to school reunion, and jeans and t-shirt on holidays.

Like the Nehrus, Modi loves to be seen in good clothes. Once he took it too far, when he wore a monogrammed suit that earned him a Malvolio image. Rahul Gandhi called his government suit-boot ki sarkar and that cost Modi the Delhi elections a month later. His wardrobe has sobered down since.

Modi also loves jazzy headgear. His I-Day addresses are becoming the talk of the town from Toronto to Timbuktu, not only for what he says but also for what he wears on his head. For his first address, he wore a polka-dotted red turban; the

next year it was an orange with shades of blue, red and green. In 2016 he donned a tie-and-dye turban in pink, red and yellow; 2017 saw him with a yellow and red headgear that had golden embroidery and a tail longer than Mandrake the Magician's, but shorter than Lady Diana's

wedding gown. In 2018 he donned an orange-and-red one with a tail, and last year it was a red-and-orange leheriya turban with a tinge of green.

This year, Modi appeared in an orange-and-yellow Rajasthani safa with a tail, said to have been sent by one Sujansinh Parmar from Tapi in Gujarat. Parmar, a farmer, has made turban-rolling a hobby, and has gifted fancy headgear to Rajnath Singh, Amit Shah and Rahul Gandhi.

Tailpiece: Following the European custom, Congress leaders used to leave their caps in the hall before entering the viceroy's room. Once Lady Irwin happened to pick up Motilal's Gandhi cap which he had left in the hall while calling on Lord Irwin. It wore the label of a fashionable London hatter.

AIMING HIGH
Skyroot Aerospace founders Naga Bharath Daka and Pawan Kumar Chandana

Space craft

A startup in Hyderabad wants to be the world's most affordable small satellite carrier

BY RAHUL DEVULAPALLI

IT IS QUITE possible that, in some years, we might hear a modified version of American composer Bart Howard's classic 'Fly Me to the Moon' from humans living in space colonies longing to visit earth. Sounds farfetched, right? Well, not if a young Hyderabad startup has its way.

Skyroot Aerospace, a two-year-old company with a mix of 40 scientists and engineers, want its rockets to be the catalyst for human habitation and exploration in space. Not surprisingly, many in the team idolise Elon Musk and SpaceX.

Skyroot Aerospace is equally ambitious. Its immediate plan—

assemble a rocket in less than 48 hours and send it to space whenever required.

While SpaceX launched its first rocket, Falcon 1, six years into its existence, Skyroot Aerospace is in a hurry; it wants to launch its first rocket by December 2021.

On August 13, the company put out a video of it test-firing an upper-stage rocket engine, called Raman, reportedly making it the only private company in India to successfully do so.

It helps that the minds powering the startup are former Indian Space Research Organisation employees. CEO Pawan Kumar Chandana was an ISRO engineer closely involved with

rocket launches and co-founder Naga Bharath Daka was an ISRO flight software engineer who designed and realised multiple avionics modules for launch vehicles. They are supported by senior vice president of propulsion V. Gnanagandhi, a Padma Shri awardee and former director at ISRO's Liquid Propulsion Systems Centre.

The startup is currently developing three rockets—Vikram-1, Vikram-2 and Vikram-3—which will act as small satellite launch vehicles (SSLV) carrying payloads ranging from 225kg to 720kg. The team wants to tap into the global market of small satellites and is also designing its own software and using 3D printing for rocket hardware. The company wants to be the most affordable satellite carrier in the segment, and charge around ₹15 lakh a kilo. It has already raised ₹31.5 crore and is looking to raise ₹90 crore more in a year. A few more rocket stages will be tested before the big launch. **●**

SONA COLLEGE OF TECHNOLOGY

An Autonomous Institution | Approved by AICTE | ISO 9001:2015 Certified | NAAC Accredited - A Grade
NBA - Accredited | Affiliated to Anna University, Chennai
Junction Main Road, SALEM - 636 005 | TN | India

Sona College of Technology has been Awarded 6 times as
AICTE-CII Best Industry Linked Technical Institute

Highest Salary
30 LPA

COURSES OFFERED

B.E./B.Tech Degree (Full time - 4yrs)

B.E. - Civil Engineering
B.E. - Mechanical Engineering
B.E. - Computer Science and Engineering
B.E. - Electrical and Electronics Engineering
B.E. - Electronics and Communication Engineering
B.E. - Mechatronics Engineering
B.E. - Bio-medical Engineering
B.Tech. - Information Technology
B.Tech. - Fashion Technology
B.Tech. - Artificial Intelligence and Data Science

MBA - Master of Business Administration (Full time - 2 yrs)

MCA - Master of Computer Application (Full time - 3 yrs)

M.E./M.Tech Degree (Full time - 2 yrs/ Part time)

M.E. - Computer Science and Engineering
M.E. - Wireless and Mobile Communications
M.E. - Engineering Design
M.E. - Power Electronics and Drives
M.E. - Power System Engineering
M.E. - Construction Engg. & Management
M.E. - VLSI Design
M.E. - Structural Engineering
M.E. - Industrial Safety Engineering
M.Tech - Information Technology
M.Tech - Data Science

Pawan Kumar Chandana,
CEO, Skyroot Aerospace

We want space flight to be as cheap as air flights

BY RAHUL DEVULAPALLI

Q/ Is this your first attempt at test-firing an upper-stage rocket engine?

A/ Yes. This is a full-scale one. We have done short-scale and smaller ones in the past. This is the actual engine that will be launched later. This is only the upper stage and there are many other stages involved, which will be tested in the next one year. They will all be integrated closer to the final launch. We want to give it our all and [attain] perfection. It is quite rare for rocket engines to be successfully test-fired in the first attempt, so that is a great achievement.

Q/ What sets the Vikram series apart from other small satellite launch vehicles?

A/ It is the simplicity of the rocket. It is a simple rocket that can be manufactured, assembled and launched very fast. Then there is the cost. It will be much cheaper than other rockets in similar segments in the international market.

Q/ The Indian government recently opened up the space sector to private players. How has your company streamlined plans after this decision?

A/ It has come at the right time. In the next one year, most of our sub-systems and rocket stages will be tested. Our hardware is in the

final stages of manufacturing. We can now use ISRO facilities, which was not the case earlier. So, this will help our testing. Also, launching requires licencing and regulatory procedures. We feel there will be no delay from the government's side and that perfectly matches our timeline.

Q/ Can you talk about the usage of 3D printing technology in your rockets' bi-propellants?

A/ The bi-propellant fluids that you are talking about are hypergolic, [whose components ignite] once they come into contact. The inside channels of the injector should not leak and, for that, we need to create two independent channels to make sure there is no explosion. It is a very critical technology. It can only be done using 3D printing. Conventionally, we used to have multiple parts assembled together. There were separate parts for the oxidiser and for the fuel. In these assembled parts, leakage is a problem. Now, all these are integrated into a single piece and the channels are made in such a way that [the components] are independent of each other. Only once they come out into the rocket chamber do they mix and burn. This way, there is more flexibility in designing sub-sets. Usually, it takes several months to manufacture (using the earlier method), but we hardly took two to three weeks. Due to this [3D-printing]

technology, reliability will increase and failure points will decrease.

Q/ Your team plans to insert various satellites into multiple orbits in a single mission. Could you elaborate?

A/ It is very rare to insert multiple satellites into multiple orbits. We have seen multiple satellites being inserted into a single orbit. So, what happens here is that different satellites require different orbits. If you are taking 20 to 30 satellites, five of them want to go into one orbit, and another five want to go to different altitudes. All this is possible with our rocket because it can restart.

The restarting phase is a critical technology and is very rare. We need to design engines specifically crafted for that. Our engine and our propellants are perfect for restarting. We can restart the rocket as many times as we want and send it to as many altitudes as we want.

Q/ SpaceX is working on reusable rockets and there are other agencies focusing on reusable rocket parts. What about your rockets?

A/ Reusability has more advantages when it comes to bigger rockets. In huge rockets, the hardware is so costly that it is worth creating

Maharshi Karve Stree Shikshan Samstha's CUMMINS COLLEGE OF ENGINEERING FOR WOMEN

(An Autonomous College affiliated to Savitribai Phule Pune University)

- All women engineering college established in the year 1991 with support from Cummins Diesel (India) Foundation located in Pune, Maharashtra.
- Approved college by All India Council of Technical Education (AICTE).
- Autonomous College from the A.Y 2016- 17, affiliated to Savitribai Phule Pune University.
- Programs are accredited by NBA in (1998, 2002, 2006, 2012, 2016, 2018 and 2019).
- Reaccredited by NAAC in 2017 with an 'A' Grade.
- 2019-20 survey ranking among the top engineering colleges in India is 45th in Outlook magazine and institute rank is 68 in India Today.
- MHRD-GOI NIRF 2020 ranking is 173.
- MOU with industries like Mercedes-Benz, Citibank, HSBC, Eaton, Persistent, Ericsson, John Deere and Boeing for various collaborative activities.
- Cummins Inc. has declared the college as their signature project.

Graduation Ceremony - 25th Graduating 2019 Batch

Winner in national level technical event
"NES Innovation Award 2020"

Represented in Khelo India
youth games 2020 in Badminton

Under this project Cummins supports student, faculty and infrastructure development.

- MOU with Purdue University, USA, Deakin University, La Trobe University and Carnegie Mellon, Australia for MS programs, research, faculty exchange and higher education.
- Cummins Fellowship Program for MS at Purdue - 100% tuition waiver, paid internship and job offer from Cummins, USA.
- Ongoing projects under (a) Centre for Research and Intellectual Entrepreneurship (CeRIE) supported by ANSYS Inc. and Cummins Foundation and (b) Incubation Centre under NIDHI scheme of Govt. of India.
- Training and Placement – Training program on Innovation, Entrepreneurship, soft skills and Career building to enhance the employability of students.
- Hostel facility for girls located at a walkable distance with wifi facility and other utilities. Well equipped gymnasium and sports facilities.

Under Graduate Programme

- BTech (Electronics & Telecommunication Engineering)
- BTech (Computer Engineering)
- BTech (Information Technology)
- BTech (Instrumentation & Control Engineering)
- BTech (Mechanical Engineering)

2019-20 Initiatives and Major Achievements

- In A.Y. 2019-20 total 94% students placed. Highest pay package of 29 lac p.a. & average pay package of 7.65 lac p.a.
- Students secured Internship opportunities in companies like Walmart Labs, Deutsche Bank, Boeing, Citi, Mercedes Benz and many more.
- Scholarships were given to students by many companies such as Boeing, Persistent, Avery Dennison, Goldman Sachs and more.
- One of a kind Citi Bridge program instituted by Citi of 100 hours completed its 4 years successfully.

Post Graduate Programme

- MTech (Instrumentation & Control Engineering - Automation)
- MTech (Electronics & Telecommunication Engineering – Artificial Intelligence)
- MTech (Mechanical Engg Design)
- Ph.D. in Electronics and Telecommunication Engineering

MKSSS's CUMMINS COLLEGE OF ENGINEERING FOR WOMEN, PUNE, Karvenagar, Pune - 411052 | Tel: 91-20-25311000 | Fax: 91-20-25311499 | Email: administrator@cumminscollege.in | Website: www.cumminscollege.org

Maharshi Karve Stree Shikshan Samstha's CUMMINS COLLEGE OF ENGINEERING FOR WOMEN, NAGPUR

- NAAC Accredited
- Commitment to nurture the atmosphere for the research and development, for the extension and collaborative activities.
- Persistent Systems Pvt. Ltd, 'Center of Excellence'
- MOU with Industries -VS Informatics, PVR Engineers, AUT Technology & Go Seva Kendra
- Curriculum Enrichment with Industry participation and hard & Soft Skills development
- Financial assistance to deserving students.

- Beyond syllabus courses on Creo, Ansys, IOT, Python, Artificial Intelligence & Machine Learning.
- 100% Concession in Tuition Fees to suicide affected farmer's daughter.
- 50% concession in Tuition fees to daughters of Armed forces and paramilitary Forces Employees.
- Bridge courses and vocational courses in relevant subject areas.

Full Time 4 Year UG Degree Programme (Engineering)
BRANCHES: Computer Engineering | Mechanical Engineering, Electronics & Telecommunication Engineering.

- Safe and secure campus and hostel facility for girls.
- Projects based on Live Problem statements from Industries.
- IND - NX 4.0 CII Hackathon runners up- 2018.
- Times Best Institution Award 2018 & 2019
- Navbharat Best Engineering College Award 2019
- MSME GOI approved - Incubation Center

hardware infrastructure around it to bring it back. When it comes to smaller rockets, they are better off being single-use.

Q/ Can you talk about the small satellite-launch market? How is it looking for players like you?

A/ In the next five to seven years, more than 10,000 small satellites are set to be launched. And up to 2027, the cumulative market will be [worth] close to \$15 billion. Currently, there is only one operational player, a New Zealand-US company, which serves the small-satellite segment; it launches smaller satellites with small rockets. There are a few other companies in advanced stages of development and a couple of others that had their first launch but did not succeed. In the next two to three years, you will see up to five companies doing their first launch, and we will be one of them.

Q/ In terms of business, are you looking at the global market?

A/ When it comes to launching satellites, more than 90 per cent of our market is overseas.

Q/ Does this also mean that you will tie up with companies outside India for launches?

A/ Yes. It depends on the customer's requirement. From India, a lot of orbits can be reached. If there is an orbit that cannot be reached from India, we can go to different places and launch from there.

Q/ What is your ultimate goal?

A/ The goal is to create a space-based economy. Today, we have an earth-based economy. We feel that resources are only available on earth, and that is because we cannot go to space at a very low

THE BIG LEAP

Raman, the rocket engine developed by Skyroot

cost. In the long run, we want space flight to be as cheap as an air flight so that anybody can go to space. Either for space tourism or to utilise the resources there.

Space has plenty of planets, comets, asteroids, and a lot of metals and resources readily available. Going to space becomes easier when it becomes existential. We can create a space-based economy where human beings can travel and live there. Expanding humanity out

into space is the ultimate goal.

Q/ What are your thoughts on Elon Musk and SpaceX?

A/ SpaceX is the biggest inspiration for any space company, not only us. It is basically a showcase of what a single company can do. We also want to go as close to SpaceX as possible.

Q/ Would you associate with government projects, including in the defence sector? What are the advantages of such an association?

A/ India has a lot of requirements, especially in defence, when it comes to launching a large number of satellites or building different kinds of rockets. It will be a huge advantage because private companies can build things much faster as there will not be much red tape.

If we want to order parts, we have to just choose our vendor and buy it in a few days. When it comes to government organisations, they need to go for a purchase order and it takes a really long time to even buy simple things. Compared with bigger organisations, operationally, startups can be more efficient, bolder and faster. Because of fewer rules and regulations, there is more innovation in smaller companies.

Q/ How was your personal experience working with ISRO?

A/ It was phenomenal. I loved working there. In fact, I had a lot of hands-on experience working on various launch vehicles. It gave me great exposure, which actually [gave us] the confidence to build something ourselves. That was only possible because of the exposure and the fascination I had after working on India's largest rockets for five to six years. 📍

SALIL BERA

STUFF OF LEGENDS

Dhoni and Tendulkar at the Eden Gardens, Kolkata, in 2013, during a Test match against the West Indies

Dhoni inspired generations to pick up the bat

BY SACHIN TENDULKAR

I FIRST SAW Mahendra Singh Dhoni in 2004, in his ODI debut series in Bangladesh. Before that, people had spoken about him, but I had not seen him at all. There was a general buzz about him—that he can hit big in domestic cricket. But whether he could hit the same way in international cricket was yet to be seen.

I remember a couple of shots he played against Bangladesh. Sourav Ganguly was sitting next to me. I told Sourav: “*Iss player ke bat swing mein kuch alag hai* (there is something different about his bat swing), there

is something special.” Dhoni had not scored many runs (12), but by one shot he hit, you could make out that he had the ability; one could judge from the sound of the bat hitting the ball. I had also seen him in the nets. To hit well in the nets and to do so in the match are quite different tasks. But, he did it.

For me, his biggest impact on Indian cricket is that he has inspired children to pick up the bat, take up the game and be like him. If you see every generation, there have been players who have motivated youngsters to do what they did. His name will be on that list. That is his contribution to Indian cricket.

My most special moment with him was, of course, the 2011 World Cup. If you ask 10 people

HIT MAN
Yuvraj Singh reacts as Dhoni hits the winning six against Sri Lanka in the 2011 ICC World Cup final in Mumbai

which shot they remember from that World Cup, all 10 would say the final-winning six by Dhoni. At the time, Viru (Sehwag) and I were the only two in the team who were sitting inside the dressing room and praying. We saw that shot on the television. We heard an uproar, and that is when we rushed out and saw the crowd making noise. It was such an incredible atmosphere out there.

But if you ask me, there is another Dhoni shot that I consider unforgettable. That shot I saw from close quarters; I was at the non-striker's end. It was a shot he played off Shoaib Akhtar at Faisalabad in Pakistan. Shoaib bowled a bouncer and Dhoni pulled it for a six. I thought it was a special shot.

Another point that is brought up while talking about Dhoni is his captaincy. From 1989, when Krishnamachari Srikkanth was my first captain, to Dhoni, who was my last, each captain had been different. There were some captains who had strong body language, some were calm,

some were hyper and some would speak a lot. Each one was different. For me, Dhoni was calm, he would think well and he had the ability to soak up pressure.

We had a number of conversations on the ground. I would stand in the slips, and we would discuss whether the ball was swinging and how the pitch was behaving. They were good conversations. From the time he first came into the Indian team in 2004, I could see how he had developed as a cricketer. Off the field, however, if I had to single out any one conversation we had, it would be in Australia during the triangular series, which we won for the first time in 2007-08. We had won the first final in Sydney and had travelled to Brisbane for the second final. I was really struggling; I had injuries that made it difficult for me to perform. That time, he came to me and said, "*Paa*ji you rest in this match. You can play the third final, if needed." I told him I will play this one, and we will see if we need to play a third one.

As for his wicket-keeping, he had his own style. When we talk of a number of players, we talk of batting or bowling technique. I do not understand much of wicket-keeping technique, but to me a good wicket-keeper is someone who does not drop many chances. And that is exactly what I would say about Dhoni. What matters eventually is how many you collect or miss; he rarely missed. When it came to runouts and stumpings, he was very aware and excellent.

I do not believe in statements like he has underachieved in Test cricket. His contribution to Test cricket has been good. He has had such a magnificent career, we should celebrate it. The rear-view mirror of a car is always clearer than the windscreen. I am sure he loved every format and loved cricket, but I think his strength is his presence of mind, being in that moment and being able to take a call. That is what all good captains have to do.

The makers of India

In the 1987 movie, *Wall Street*, the industrial worker and trade unionist father Carl Fox confronts his finance whiz kid son raking in his millions, making money out of money, with words that resonate across America even today: “You stop going for the easy buck and produce something with your life. Create instead of living off the buying and selling of others.” America paid little heed to those words for two decades thereafter till the money machine imploded in 2008. Donald Trump came to power promising to bring manufacturing jobs back home from China.

It was no coincidence that in 2006 India also woke up to the challenge of revitalising Indian manufacturing, having lived through a decade of fantasy that services sector growth would help it leapfrog into the 21st century. Manmohan Singh's National Strategy on Manufacturing (2006) aimed to take the share of manufacturing in national income from 16 per cent in 2006 to 25 per cent by 2020. Prime Minister Narendra Modi took this strategy forward calling it ‘Make in India’. Six years later, manufacturing's share remains stubbornly stuck at 16 per cent.

A key policy initiative aimed at facilitating Make in India has been to improve the Ease of Doing Business. Various incentives, including cuts in tax and interest rates, have been given to the mobilisers of capital. Acquiring land and employing labour have been made easier. There is a growing celebration of enterprise, especially of small and medium entrepreneurs, and being self-employed has been made into an act of great creativity and patriotism. All this is good.

However, rapid industrialisation requires increasingly productive labour. The working class are the soldiers in the war against poverty and in the drive for modernisation. It is, therefore, surprising that few political parties have focused on improving labour productivity and the social

security of the working class. Prime ministers, from Lal Bahadur Shastri to Narendra Modi, have said ‘Jai Jawan, Jai Kisan’, rarely do they say Jai Mazdoor. China's rise has been on the back of its “creators”, to use Fox's term for workers, and not just its traders.

The unionised working class has often been damned as a labour aristocracy that has prevented the growth of industrial employment. While industrial labour unions may have their faults, they can hardly be blamed for policies that have encouraged capital-intensive manufacturing rather than labour-intensive manufacturing. Consider the fact that so much of India's labour-intensive

manufacturing activity is getting exported out, and workers in Bangladesh, no less organised or militant than their Indian counterparts, are getting the jobs that workers in Gujarat are losing.

Why is it that political leaders are so quick to say Jai Kisan and so slow to say Jai Mazdoor? Prime Minister Modi's Independence Day speeches have hardly said much to enthuse the industrial working class even as he has spoken so often about Make in India and

Ease of Doing Business. This, despite the fact that the largest trade union organisation today is the Bharatiya Mazdoor Sangh (BMS), affiliated to the RSS and the BJP.

In the focus on the large deficit that India faces in its merchandise trade with China attention is often drawn, and correctly so, to China's various unfair practices ranging from hidden subsidies to non-trade barriers. However, an important factor that has made China's exports more competitive has been the rising and high productivity of Chinese labour. The average Chinese worker produces more per hour of work and unit of capital than the average Indian worker—thanks to being better skilled, better fed and in better health. Make in India requires investing in the capabilities, health and social security of the ‘makers of India’.

Baru is an economist and a writer. He was adviser to former prime minister Manmohan Singh.

LPU - The Indian University from Where Google and Microsoft Hire

While most schools have willingly chosen the path of advancement, when it comes to higher education, the number of universities embracing the integration of technology in their learning methods reduces substantially. At one side, the top public universities are yet to upgrade their infrastructure, on the other, while there are few private universities that offer a complete package of quality teaching, intuitive learning, and industry training to mindfully build a lot of students that companies like Microsoft and Google like to hire from.

One such university that is continuously raising the level of quality education is Lovely Professional University. Established in 2005, it is the largest single-campus university in India. The university has managed to set a new bar in such a short span with the quality of education it provides; its impeccable placement records being the proof.

Each year, LPU witnesses a number of industry giants and well-known MNCs like Amazon, SAP, Cisco, Microsoft, Infosys, Bosch, Dell, amongst many others in attendance to its placement drives.

LPU student got selected in Microsoft at Rs. 42 lakhs package by Microsoft which is the highest package received by an Engineering fresher (passing out in 2020) in the region.

Now, what makes LPU students industry ready?

The Infrastructure

LPU, provides its students with a

Launchpad to fuel the flight of their career with the world-class infrastructure.

From aerodynamic to iMac lab, LPU has dedicated lab for each field of course to help students gain practical skill-sets. Apart from these, the university also has India's largest sports area with Olympic size swimming pool, on-campus hospital, 6 storied library, modern classrooms & auditoriums.

Exposure through Diversity

LPU has an inflow of more than 3000 international students from 50+ countries apart from domestic students coming from across India. With the diversified population as such, the students not only learn from the cultural vibrancy but also become part of the world.

Academics

Faculty: To ensure that its students get the relevant industry experience & guidance, LPU has industry experts and experienced professionals as its faculty members.

Live projects: From building solar cars to having a full-fledged student-run hotel (for Hotel Management students to help acquire the skills), LPU ensures that students have ample opportunities to get the hands-on training required to supplement their academics.

Industry experience: LPU has extensively integrated full-term optional / compulsory internships,

summer trainings, study tours, 'On-the-job' trainings, as well as skill enhancement events into its curriculum.

Placement Workshops

Companies like Amazon, Microsoft, Dell, Bosch etc. attend these placement rounds and as history holds witness, that every year, several students from LPU have deservedly bagged A+ level jobs with these industry giants. Even niche companies like Qualcomm that powers almost all the mobiles, also hires at LPU. On record there are more than 110 companies that hire from IITs/IIMs also hire LPU students.

LPU has put up a strong online system and processes that encourage students to study and learn. So, until the government allows universities to open up for its students, LPU has made sure that teaching and learning do not stop. The University have started the classes in online mode in August 2020. Admission to LPU is closing soon.

For more information on LPU's admission process please visit www.lpu.in or call at 1800 102 4057. You can now also contact the university through WhatsApp on +91-9852569000

Creating Professionals Through Planned Transformation

GNIOT Group of Institutions, Greater Noida was founded in the year 2001 on the plot no 7, Knowledge Park 2, Greater Noida, Delhi-NCR, India, under the umbrella

DR. RAJESH GOEL

(B.E, M.Tech Gold Medalist, MBA, Ph.D)

Director - Greater Noida Institute of Technology, Greater Noida

of Shri Ram Educational Trust. It is now a learning home for over 3500 students, covering a spectrum of engineering & management disciplines. It is approved by AICTE and is affiliated to Dr. A.P.J. Abdul Kalam Technical University, Lucknow. The institute had got its first NBA accreditation in four major engineering branches in the year 2008/2009.

30 | THE WEEK • AUGUST 30, 2020

In order to attain its objective of being a world-class education provider, Greater Noida Institute of Technology (GNIOT) is devoted to noteworthy enhancement of its facilities and laboratories, essential for world-class research and all-round development of the students.

High-tech laboratories having calibrated equipments with international specifications, state of the art workshops and plentiful work stations with authentic softwares play an important role as the part of students' learning experience.

Besides various laboratories and workshops, many Centre of Excellence (COE) exists at GNIOT Group of Institutions. These COEs acts as a body in an organization that works hand in hand with business units (BUs) & product lines.

The adoption and operation of industry specific curriculum is well in place. At GNIOT, Live projects and Case Studies are being regularly implemented in consultation with the corporate world. Problem-based learning (PBL) by way of academic/industrial projects is given due pace for the specific & relevant field.

GNIOT Group of Institutions is on a task to equip its students with

appropriate skills & practical exposure through internships and trainings. Increasingly, employers expect that students have internship experience so that students come to their first job as skilled and trained persons, ready to hit the ground running. In a big planned way, industrial trainings are the regular mandatory features at Greater Noida Institute of Technology (GNIOT).

The alumni association is the most important and integral part of an educational institute. GNIOT Alumni Association is envisioned and formed as a lifetime platform to facilitate effective and faster communication among the alumni members and the present day students. Alumni of GNIOT Group of Institutions are regularly in touch with the various departments and present student. Alumni are continuously sharing their expertise and best practices in a given field.

Training and Placement Cell of GNIOT Group of Institutions is the hub for all the possible interactions between the corporate sector and its students through various campus drives.

At GNIOT Group of Institutions, every effort is being continuously ensured to create professionals through planned transformations.

NURTURING LEADERS FOR TOMORROW

Shree Guru Gobind Singh Tricentenary University is one of the best Universities in Delhi NCR stepping forward every day, propagating the message given by the great Guru of Sikhs, Guru Gobind Singh, "spread of learning is the best service to mankind." They are nurturing future leaders by transforming their lives and diversifying professions. SGT University is situated on the outskirts of Delhi and Gurugram, carrying the versatility and vibrant culture. The aura of the university premises is reflecting the energy and embracing the diversity with equal passion.

At SGT University, they develop qualities like innovative thinking, leadership, and ethics into tomorrow's future. SGTU is leaping 2002 after establishing **SGT Dental Hospital** under the capable supervision and guidance of Dashmesh Educational Charitable Trust. They are taking the lead since its inception and marking its position in leading educational surveys conducted by prominent organizations such as Jagran Josh, Times of India, etc.

SGT University has 18+ faculties that are offering 170+ courses in the domain of **Allied Health Science, Indian Medical System, Behavioral Science, Dental Sciences, Medical and Health Sciences, Nursing, Pharmacy, Physiotherapy, Agricultural Sciences, Commerce and Management, Education, Engineering and Technology, Fashion & Design, Hotel & Tourism Man-agement, Law, Mass Comm. & Media Technology, and Sciences.**

SGT University has several laboratories

and training centers to make students industry ready with the labs like **Apple lab** known as **Centre of Excellence, UNESCO Bioethics, IBM, Weather Lab, ORACLE, University of California-Berkley, NSE, CIMA & German Academy for Digital Education.** It is high fortune for the students of India that SGT University has Asia's first simulation lab named as **National Reference Simulation Centre** established with the association of **Laerdal, Jhpiego and Indian Nursing Council.**

SGT University reimagining the future in all disciplines.

This is a University that personifies the core principle of critical thinking with experiential learning. They have collaboration with various universities and industries to shape tomorrow's dynamic future. SGT University aims to train students' minds and souls to make them productive for the country. The University invites distinguished personalities and the best minds from around the world to provide the right guidance. They engage our students' minds to achieve the right goal.

SGTU's capable faculties and thoughtful leaders make a difference among students that are helping them shine brighter not only in the nation but around the globe. With three pillars that include world-class innovative labs, modern infrastructure, and award-winning experienced academic staff, SGTU offers world-class knowledge and hands-on experience to the students to become industry assets. SGT University provides equal opportunities to the students in all domains, i.e., academic,

practical training, and cultural activities. They are seeding the world with new talent to lead the industry with imagination, creativity, and power to see the world beyond the present.

Being a reputed research institution SGT University is leading the new wave of thoughts through a multi-disciplinary approach. They support our students in finding a practical solution to their problems to make the real difference. Their faculty members help students to explore the impact of early childhood development on the exciting space of artificial intelligence.

SGT University is not only aiming to provide the academic knowledge to our students but also preparing them to contribute to making our planet more safe and green for our future generations. Also, they are motivating our students to explore automation and smart cities' process to create a productive life for tomorrow. Moreover, SGTU aims to make students understand the developed nanotechnology that is capable of removing pollutants from water to contribute Swach Bahrat Abhiyaan. SGTU is making our students know more about the sustainability of global resources to make them productive and responsible citizens. They are studying and exploring the relevance of natural resources through earth sciences that help us look into our past to learn about our future.

SGT University is giving space of opportunities to the students to fly high in the sky and faculties are helping them as the torchbearers to show them the right path. The primary aim of the university is to create future leaders for tomorrow.

CHITKARA UNIVERSITY, PUNJAB

DR. MADHU CHITKARA
Pro-Chancellor, Chitkara University

1. How your college/university has responded through online solutions and /other initiatives to the Covid-19 pandemic, please provide details about the technology platforms deployed?

The transition from on-campus to online mode of course delivery has been quite seamless at Chitkara University as we have requisite IT infrastructure already available on our campus pre COVID-19. This pro-active strategic planning done over the last few years has helped us meet all the learning outcomes of our students in terms of course delivery, lab demonstrations duly supported by online formative and summative assessments. In fact, we are proud to share that Chitkara University has been ranked among top 3 percent of the university worldwide by Times Higher Education (THE) Impact Ranking 2020 and conferred "E-Learning Excellence for Academic Digitisation" (E-LEAD) Certification from Quacquarelli Symonds-IGAUGE, for our readiness & excellence in online education. Also, Chitkara University has

been ranked among top 25 institutions in ARIIA Ranking-2020 released by MHRD Innovation Cell, MoE, GoI for its latest research, innovation and incubation efforts. Chitkara University has received all these rankings/certification during the COVID-19 to get recognised for its long time initiative and fully functional system after a rigorous audit of readiness of university to cater the requirement of students, teachers & staff.

2. What is the response of students and parents to your online and / or other initiatives.?

The curriculums have been modified in ways consistent with the on-going situations and practicality. Polling /Quiz /QAs /Screen Sharing are some of the many ways where students actually feel their participation and therefore are not bored. PBA (Project Based Approach) has been adapted where students form groups and work in teams in chat-rooms / breakout rooms. Whereas LMS (Learning Management Systems) of Coding Ninja / Code Quotient empowers them with impeccable tools, their regular assessment on My Anatomy Platform enables them to aspire for more. With our virtual classes, a student is never alone or never feels as just another one in the crowd.

3. What are the prospects of campus placements during and post pandemic?

All the educational institutions have been shut down since March 2020 and most of the businesses who recruit the prospective students from these colleges have either not gone fully operational or working with less capacity. But we are very happy to share that at Chitkara University, we are well placed in terms of campus placements for the current batch of 2020. We have been very lucky in this

regard and have completed almost 95 per cent of placements for the outgoing class of 2020. This is because of the many factors like industry aligned specialisation programs, industry approved progressive curriculum, and more emphasis on hands-on aspect of technology exploration.

4. What kind of research has been done and going-on in Chitkara University to contain COVID-19?

We have a system in place where every single research paper being communicated to any journal/ conference needs to pass the muster of high quality. Our Faculty researchers have contributed not only toward suggesting models to predict the growth and decline of Covid 19 across India and different parts of the world but they have also suggested the usage of different kinds of Ayurvedic medicines for possible treatment of this disease. While research work of one of the Faculty members from Pharmacy department has got published in esteemed journal 'Life Sciences', a note of another research paper has been taken by prestigious newspaper 'The Sunday Guardian'. While media school has analyzed the impact of addresses by our Hon'ble Prime Minister Shri Narendra Modi ji to the nation, hospitality school has worked on the effect of Covid 19 on the hotel business. Team of Researchers in 'Data Mining' domain have developed an algorithm to do the sentiment analysis of the messages related to Covid-19 posted on Twitter.

Besides that, university organized a National level innovation competition worth 1 Crore prize money named as 'Novate plus', under which proposals were invited to come up with solutions to tackle the present Covid 19 situation.

YOUR DREAMS. YOUR GOALS. YOUR UNIVERSITY

Whatever the dream, Chitkara University can help you get there. Located just 30km from Chandigarh, Chitkara University offers a world of learning that will help you reach your goals. Opportunity to get placed at one of the 1000+ companies that visit for campus recruitment. Learn from an outstanding faculty at our state-of-the-art teaching facilities. Choose from our varied industry endorsed programs. And meet other students with dreams as big as yours.

Breakthrough programs. Rising rankings. Outstanding alumni network. Highly rated academic credentials. Unlimited opportunities to embark on research from day one. Experience global education with 250+ foreign University partners. Kickstart your startup idea at one of the largest University Incubators. Everywhere you look, Chitkara is a University on the rise.

COME AND EXPLORE YOUR POTENTIAL AT CHITKARA UNIVERSITY.

ARMY INSTITUTE OF LAW, MOHALI

Army Institute of Law (AIL) has been in the field of legal education for the last 20 years and has carved an identity of its own. AIL runs both under graduate and post graduate programs i.e. B.A. LL.B Five years and LL.M one year. Admission to B.A. LL.B program is through its own National level online computer-based law entrance test (LET). The Faculty on roll is UGC qualified and most of them are Doctorates. The institute has a rich library, having a number of e-resources to encourage research among students.

**MAJ GEN
(DR.) VIKRAM TANEJA**
Chairman, AIL

Army Institute of Law has grown as a centre of excellence in the field of legal education. Continuing our march ahead on the growth trajectory, we reaffirm our commitment to dedicate ourselves in making every student industry ready. We are, towards this aim, consistently striving to foster a strong industry-academia partnership. To facilitate the overall growth and development of students, the Institute has an impressive infrastructure in its state of art well-structured campus with modern hostel and recreation amenities. We constantly strive to attract passionate faculty and capable students, to nurture an academically oriented professional environment. Our stress on participation in subject specific activities such as moots, debates, in addition to participation in extracurricular activities has brought laurels to the institute and is symbolic of the indomitable

spirit of our students and the desire to excel in the contemporary world. Over the years, our students have proven their mettle and carved a niche for themselves at prestigious global fora.

At AIL focus is always on practice-oriented education. The Institute aims to prepare students to take the challenges of the profession with ease. In addition to the regular curriculum, weekly lectures by experts are organized on the ongoing topics/issues relevant to the society to encourage students to deliberate and contribute towards framing of the legal framework. Various societies have been set up with the involvement of students for their capacity building. AIL alumni are successfully practicing in the High Courts and the Supreme Court. Many of the alumni have set up their independent law practices and are partners in corporate law firms. The institute envisions to be the top leading law institute of the country.

THE NEW EDUCATION POLICY CHANGES EVERYTHING

MR ADITYA BERLIA
Chairman, CII Delhi and Co-Promoter,
Apeejay Stya and Svrn Group

The New Education Policy adopted by the Parliament and well proclaimed by the Prime Minister is a fundamental restructuring and revolution of the entire education system of India. It has been decades in the making, and the final policy does not disappoint. Due to the far-reaching changes, a dozen or more acts will need to be revised or scrapped, and thus the true impact will only come once the policy is implemented through the legislative process.

The media has covered a few interesting changes. Still, students, parents, and educators do not seem to realise the far-reaching implications of the policy for schools, higher institutions, and for every single resident of the country.

For higher education and colleges, the most crucial thing to note is that many of them will close.

The policy has made it clear that single-stream colleges will be phased out over the next few years and only those who offer multi-disciplinary approaches (such as Apeejay Stya University) will be allowed to continue. In its earlier drafts, it was explicit in the desire to close down tens of thousands of institutions and colleges which while had great marketing were not offering a modern 21st Century education.

Most colleges are not prepared for the transition, and one could even argue right now that they do not yet have a clue what that transition requires or how to go about it.

This is an important watershed moment in the history of our country.

Parents and students who are considering options should ask up front if the college they are applying for has a multi-disciplinary approach (for Bachelors / Masters) that includes a wide variety of subjects outside the core focus. Even the IITs and IIMs have been asked to now finally take the much-needed

reformation steps to become closer to what they have always thought as their global peers.

This is an essential shift as many colleges have gotten away with merely taking off the shelf-curriculums of their regulator / affiliating university and walking their students through it. For the time, they will be forced to adapt their syllabus not only on an outcome-based approach directed by the new GEC but also be able to stand on their own in defending their academic systems. The cut-copy-paste approach to education now gives way to a system that rewards localisation and pedagogical diversity.

With affiliating universities being scrapped, students will have a larger number of choices among the colleges that remain and which will be empowered to teach and research according to their vision, mission, philosophy, and the needs and aspirations of their students.

For parents and students, this is an exciting time even during the transition period. The millions of higher education aspirants, finally, now have a policy and regulatory system that meets their needs and can deliver on their aspirations.

Approved & Recognized By

Center of Excellence

RAJ KUSHWAHA
Chairman and Managing Director
Axis Group

Enthusiasm, efficiency and refusal to surrender are virtues of a true student. Be fearless and resolute, all obstacles will melt away before you.

Education is all about creating an environment of academic freedom, where bright minds meet, discover and learn.

Axis Colleges, an integral part of the Axis group is fully involved in developing futuristic talent and industry-ready professionals. Imparting education from primary to master and competitive entrance exam preparation, with a vision to equip students with a first-rate education and necessary practical skills as well as strong interface with the corporate world to ensure that they stand out best in today's world.

Axis Colleges is devoted to excellence in teaching, research, and innovation, and to develop leaders who'll make a difference to the world.

The unique difference being that Axis Colleges have been established by and managed by passionate academicians with the sole mission of making each and every student "Industry ready." A collaborative environment that celebrates limitless thought. It combines rich theory and real-world practice to develop students who go on to become corporate leaders.

Axis Colleges is a chain of colleges spread over 63 acres of land located in Rooma, Kanpur which provides an excellent education in Technology, Architecture, Fashion, Management, and Diploma courses. Axis Colleges has the ability to extract the best from the best and committed to continually challenge to do and raise the bar of excellence to be a distinctive premier institution.

The learning environment at Axis Colleges represents the unique blend of distinguished faculty, brilliant and intellectual students with a proactive collaboration with industry that helps them acquire a great perspective to innovate and excel across the country.

We are proud that Axis colleges are synonymous with practical and industry-focused education that attracts the best student. Axis students are groomed to be the leader in whatever field they choose.

Wishing all a flourishing career.

LLOYD LAW COLLEGE

17 Glorious Years in Exclusive Legal Education

MR. MANOHAR THAIRANI
President, Lloyd College

Lloyd Law College is a premier educational institution offering legal education since year 2003 in affiliation with CCS University, Meerut, U.P and approved by Bar Council of India. The College offers two pathways of law degree: BA.LL.B - five-year program and LL.B - three-year program. The College was blessed with the guidance and patronage of Padma Shri Prof. (Dr.) N.R. Madhava Menon, "The living legend of Law" and the flag bearer of legal education reforms in India. Prof. Menon is a visionary of legal education who is also the designer and architect of the five-year integrated B.A.LL.B. Programme in India and the Founder of the premier legal institutions of the country. Lloyd imparts legal education ensuing practice and profession oriented teaching methodology. Our process of

education with contemporary courses and compendious curriculum are designed to focus on inculcating legal knowledge and cultivating professional skill sets. The College, since its inception, is continuously striving to achieve excellence, which has been recognized through numerous reputable awards and collaborations Lloyd ranked amongst top 3 North India and top 10 all India best law colleges of India - Annual Survey by India Today, Outlook and CSR in 2019-20. Lloyd was awarded the "SILF-MILAT Institutional Excellence Award" in 2018 from Shri Venkaiah Naidu, the Hon'ble Vice-President of India.

Modern legal education is focusing on bridging the gap that exists between the classroom and active profession and industrial expectations and Lloyd has taken many innovative and practical steps towards bringing the learning experience of law as near to its actual practice as possible with the establishment of highly successful skill development initiatives. Lloyd takes a dual mode approach to the same, firstly by establishing skill development centers and secondly through increased interactions with leaders of the industry.

College has established twenty dedicated centers of study creating a platform for functional and cross-functional, inter-disciplinary

academic activities, both inside and outside, the organization to capture new knowledge and practices. These centers aim at research capacity building among the students. The centers include (i) Lloyd Trial Advocacy Center; (ii) Judicial Services Preparation Center; (iii) Lloyd Alternative Dispute Resolution Centre; (iv) Moot Court Society; (v) Legal Aid Society; (vi) Personality Development Cell; (vii) Forensic Science Law Center; (viii) Environmental Law Center; (ix) Center for Women's Rights and Family Studies; (x) Public Interest Litigation Cell and Bank Frauds Legal Aid Cell (xi) Internship and Placement Centre (xii) Debate Society, etc.

Lloyd Law College is actively engaged in various collaborations and partnerships both nationally and internationally. These collaborations between Lloyd Law College and other international and national institutions, aim to extend to the students an opportunity to study with the accredited partner universities and gain an in-depth exposure to a different study environment and include scholar-ships worth 20600 USD. In an era of globalization, where the world has become a global village, these collaborations by the College are aimed towards helping students gain awareness and facilitate excellence.

A RESERVOIR OF KNOWLEDGE SHOBHIT INSTITUTE OF ENGINEERING AND TECHNOLOGY, MEERUT (A NAAC ACCREDITED DEEMED TO BE UNIVERSITY)

Shobhit Institute of Engineering & Technology, a NAAC Accredited, Deemed to-be university, stands for going beyond the established standards and nurtures technocrats and managers so that they have a global vision and insight in their chosen fields and are globally employable in emerging areas with special focus on present requirements.

We believe that the essence of the University is to create, integrate and disseminate better understandings of the world around us through knowledge. Recognizing that students and faculty shift between and share all three roles, we challenge the notion that knowledge is static and insular. Instead, we welcome and enable a diverse and dynamic learning community of scholars, teachers, and learners.

Our strong Alumni Network, of more than 50000 graduates, extends throughout the world. Our proud graduates are serving a wide spectrum of industries globally.

ICAI ESTABLISHES CENTRE FOR AUDIT QUALITY TO BOOST INDIAN FIRMS' GLOBAL STANDING

CA. ATUL KUMAR GUPTA
President, ICAI (2020-21)

The Institute of Chartered Accountants of India (ICAI) is the second-largest accountancy body of the world and acts as a Regulator of the Chartered Accountancy profession in India. Over the years, ICAI has been tirelessly working towards providing quality education & internationally benchmarked training for students; continuous professional development of members in niche & emerging areas; Improving Quality of Financial Reporting and Assurance

functions through strong framework of standard-setting and enforcement.

The purpose of an independent audit is to provide confidence to the users of audited financial statements in the quality of financial reports, in particular their reliability. Improving audit quality and the consistency of audit execution is essential to maintain confidence in the independent assurance, provided by the auditors. In this regard ICAI has decided to open **Centre for Audit Quality at ICAI's Centre of Excellence, Jaipur** which would enable the Institute to have a more angular discussion on the qualitative aspects of the audit function and to provide a conducive environment for doing research projects in the field.

CA. Atul Kumar Gupta, President, ICAI said "India is on the cusp of a huge data revolution. It has become essential to advocate the position of the auditors to the various stakeholders to fill in the expectation gaps. In such changing times, a Centre for Audit Quality can play an important role that would further build Investor's confidence and develop Public trust at large".

The Centre of Quality will aim for:-

- To develop Framework for Audit Quality.
- To develop Audit Quality Maturity Model.
- To conduct contemporary Education and Training in area of audit and allied areas for continuous improvement of Audit Quality.
- To conduct CPD specialized training programmes for Professional Accountants to enable them to perform audit in full compliance with principles of Audit standards.
- To pursue Research and Innovation in area of audit for improving Audit Quality.
- To deliberate on the experience of Audit Committees for improving Audit Quality.
- To develop and promote Audit Quality Indicators.
- To invest and enable access to cost effective Digital and online Resources for accountants /accounting firms for high Audit quality.

Can violence be sacred, democratic?

Swapan Dasgupta's claim in a newspaper column that the Ram Mandir "links antiquity to present" does so by the neat trick of bypassing all that has happened in between. Dasgupta's verbal legerdemain is best revealed by his gentle expression "removal of the disputed structure" to draw a veil over what the Supreme Court in its judgment had described as an "egregious" act of barbaric violence. The Babri Masjid was not "removed"; it was destroyed, desecrated, dismantled brick-by-brick by a gang of thugs claiming allegiance to hindutva.

And that explains too why Dasgupta had to hurriedly correct his assertion of the event having resulted in a "national reawakening" to this having done so "among Hindus at least". More accurately, he could have argued "among my kind of Hindus at least". For on this occasion, more than ever before, it is important to distinguish between "Hindu bhakts" and "hindutva bhakts".

We have two marvellous works, published at the same time as Swapan's article (early August) to underline the distinction between the two. Both are by highly regarded historians, one who teaches abroad and the other in India: Prof Vinayak Chaturvedi's *Violence as Civility: V.D. Savarkar and the Mahatma's assassination*, published in the learned journal, *South Asian History and Culture*; and Dr Aparna Vaidik's *My Son's Inheritance: A Secret History of Lynching and Blood Justice in India*.

Citing Savarkar's final work in Marathi, *Saha Soneri Pane*, published in English as 'Six Glorious Epochs of Indian History', Chaturvedi says Savarkar saw these "epochs" as "inspired by a code of conduct called 'Hindu civility'". For Savarkar, "violence, in the form of assassination, was not only ethical, but also a foundational aspect of Hindu civility... any understanding of

civility must also take into account the virtuous, ethical and necessary uses of violence".

Savarkar hated Gandhi and held that Asoka was "anti-national" because he embraced the central Buddhist doctrine of "non-violence". It is this cult of violence that was on display when pious practitioners of hindutva, inspired by Savarkar's doctrine, "removed" a symbol that links antiquity to the present but only through the Buddha, Mahavir, St Thomas, Prophet Mohammad, Adi Sankara, and the Bhakti movement, which gave us the Sikh religion as its finest flower. We are the inheritors of all that, not just of "antiquity". It explains why Hindus were in a three-quarters majority after Muslim rulers had sat on the throne of Delhi for 666 years.

Vaidik analyses through her study of mythology and history how the story of the lynchings since the BJP came to power of "Zahid Ahmad, Noman, Mohammed Akhlaq, Mazloom Ansari, Imtiaz Khan, Mustain Abbas, Vashram Sarvaiya and his brothers, Mokati Elisa and Pehlu Khan" is linked to hindutva. "Each act of lynching," she says, "entrenches the Hindu supremacist's sense of being a

historical victim and in turn criminalises the dalit, the Muslim or the Christian... Nothing removes the paranoia of the majority community... violence has been externalised, othered, and justified in the name of enacting social justice."

It was because Nehru, as prime minister, did not share that paranoia and revanchism that he refused to attend the inauguration of the Somnath Temple. It is because Modi is inspired by Savarkar's view, that, "both bloodshed and violence are necessary for Hindus" that we saw the prime minister perform a *sashtanga namaskaram* at Ayodhya without one word of compassion or sympathy for our Muslims or any offer to attend the inauguration of their alternative mosque, if invited.

Trust deficit

Muivah wants the interlocutor sacked

BY NAMRATA BIJI AHUJA

ON JANUARY 29, Thuingaleng Muivah, the 86-year-old general secretary of the Isak-Muivah faction of the National Socialist Council of Nagaland, left the group's headquarters in Camp Hebron for Chumukedima, a tourist village in Dimapur district. It was a long, bumpy ride through dusty, potholed roads. So Muivah rested that night and joined a team of negotiators of the NSCN(IM) the following morning. Together, they met R.N. Ravi, the Union government's interlocutor for Naga peace talks.

Ravi had facilitated the signing

of a framework peace agreement between the Union government and the NSCN(IM), the largest of the Naga insurgent groups, in 2015. The final agreement was to be signed before October 31, 2019 last year, but talks had reached a stalemate and the deadline passed.

The meeting at Chumukedima was meant to iron out differences and help finally conclude the peace talks that had been going on since 1997, when the NSCN(IM) signed a cease-fire agreement with the government. But it did not go as planned. Ravi

wanted the NSCN(IM)'s negotiators to accept that the peace talks under the framework agreement were being held "within the framework of the Indian Constitution". The NSCN(IM) negotiators were dismayed; they said the framework agreement had provided for a "new relationship" between India and Nagaland, outside the Constitution's purview.

Matters went downhill fast. The NSCN(IM) accused Ravi of having "manipulated" the peace process. Ravi reportedly said even "Class 7 students" could understand that accepting the Constitution was part of the framework agreement. Foul words were exchanged.

Muivah felt Ravi had broken his trust. Under the framework agreement, the two sides had agreed to hold talks based on "mutual respect and understanding" to end the decades-long insurgency. After the meeting, though, the NSCN(IM) said peace talks were "coming to a nauseating end because of the mischief of the interlocutor".

Trouble has been brewing since last July, when Ravi was appointed as Nagaland governor even as he held on to the post of interlocutor. NSCN(IM) leaders alleged that the deadline set by him for signing the peace deal was never part of the framework agreement. According to them, "shared sovereignty" was the only way forward to end the conflict. For his part, Ravi accused NSCN(IM) of imputing "imaginary content" to the framework agreement.

Muivah, who has been camping in Delhi, wants Ravi to be removed as interlocutor immediately. According to sources, the Prime Minister's Office has asked two directors in the Intelligence Bureau to reach out to the NSCN(IM) and sort out differences. Security agencies worry that the tension could kickstart a fresh wave of insurgency in Nagaland. That Ravi is absent from the talks in Delhi shows the Union government's declining

OUR PRESTIGIOUS RECRUITERS

ROOTING FOR PEACE
Elu Ndang (third from left), general secretary of Naga Hoho, at a peace rally in Delhi last year

confidence in him as an interlocutor.

Ravi was not always disliked. In fact, Naga Hoho, the apex tribal body in the state, and the seven-member Naga National Political Groups (NNPG) were initially happy with the signing of the framework agreement and the progress of the peace talks. "Ravi took initiative to bring the NNPG on board by signing the 2017 Agreed Position or Preamble with them," said Elu Ndang, general secretary of Naga Hoho. "The Naga people want a solution. But before arriving at it, Ravi was made governor. That dual role has created a huge problem."

In June, Ravi wrote to Chief Minister Neiphiu Rio that the "scenario in the state is grim" and that "law and order has collapsed". He alleged that the state government remained a mute spectator as "armed gangs" operated freely in the state. "The same people [the NSCN(IM) and the NNPG] whom the government had been talking to for 23 years were termed by Ravi as armed gangs," said Elu Ndang. "It was uncalled for. Ravi also insisted that the state government make government employees declare their links with Naga political groups. What was the need for him to

term it as a law and order problem?"

The NSCN(IM) recently released what it claims to be a copy of the framework agreement, which had been kept confidential by mutual consent since 2015. The copy says the agreement "will provide for an enduring, inclusive new relationship of peaceful coexistence of two entities". According to the NSCN(IM), the word 'new' is absent in the "doctored" document allegedly prepared by Ravi. "New relationship' strongly indicates [that the agreement is] outside the purview of the Indian Constitution," said an NSCN(IM) leader. "When that word is removed, there is room for misinterpreting it as being under the Constitution."

The Union home ministry has decided not to release the framework agreement under the Right to Information Act. The decision has been upheld by the chief information commissioner, who ruled that the disclosure can affect India's security and strategic interests. So the question of whether the agreement was doctored is not likely to be resolved soon.

Naga groups are now split over the future of peace talks. The NNPG openly support Ravi, saying the

agreement he had signed with them in 2017 gave "fresh impetus to the stagnant talks". Alezo Venuh, co-ordinator of the NNPG's working committee, said the NSCN(IM) had destroyed the Naga people's relationship with their neighbours in Assam, Manipur and Arunachal Pradesh.

P. Chuba, former president of Naga Hoho, however, said Ravi's divide-and-rule policy had precipitated the present crisis. "After two years of consultations with the NSCN(IM), Ravi was trying to sideline the group," he said. "No inclusive settlement can happen with a divide-and-rule policy. It will intensify bloodshed."

H.D. Deve Gowda, who was prime minister when the NSCN(IM) signed a ceasefire agreement with the government in 1997, issued a statement saying the progress made in the last 23 years should not be forsaken now. "I sincerely hope," he said, "that the distrust is put aside, talks continue, and a peace accord is reached at the earliest." •

Colleges in Andhra Pradesh and Telangana are developing new strategies to deal with the Covid-19 situation

BY ABHINAV SINGH

Most colleges in the Andhra Pradesh and Telangana, like any other region of the country, have had to deal with an uncertain situation wherein education institutes had a long closure. Uncertainty persists for the colleges and currently the college authorities do not foresee any immediate clarity as to when they will open in the two states. Many have adopted to the new normal and have embarked on online classes and their admissions have also gone the online way.

One common aspect that emerged is that almost all of them have equipped their faculty with laptops and have started using conferencing platforms such as Google meet and Cisco Webex for their on-

Colleges in both the states have realised that a multi-pronged strategy is necessary to manage the Covid-19 crisis.

line sessions, which is proving to be productive for them. All of them expect early opening of their colleges so that vibrancy returns to their campuses and students enjoy the joys of physical classroom teaching.

Initially, many colleges in the state thought that the lockdown was a temporary phase that would end in one or two months. However, when the pandemic kept dragging on and there was a prolonged phase of the lockdown, many of them embarked on a new strategy to deal with the shut down of institutes. Some of them strengthened their existing online infrastructure and platforms while a few of them adopted to the new normal with new online setups and platforms.

OUR MAJOR RECRUITERS

ACCREDITATIONS & RECOGNITIONS

Bachupally, Kukatpally, Hyderabad-500 090 Telangana, INDIA

Tel : + 91- 7207344440 E-mail: info@griet.ac.in, URL: www.griet.ac.in

Hyderabad already had a policy of equipping all their faculty members with laptops and it was a seamless transition for them. At the same time, they also conducted an assessment that revealed that around 95 per cent of their students were equipped for online classes. The college also went ahead and started using online meeting platforms such as Google Meet and Cisco Webex for online teaching. The college also has an online student management system that has been upgraded with features for sharing materials like subject notes, e-books, presentations, etc. All the quizzes, assignments, tests are also conducted through Google Classroom. The college is using the TCS iON for content sharing.

"We have a very strong student counselling system. Interaction with management, faculty, administration staff, etc, is carried out online with appropriate platforms. Our college is registered with online learning platforms like Coursera, TCS iON, etc in addition to Government of India initiatives such as NPTEL and SWAYAM. All the faculty members have done certification courses through these platforms. Hence they got an opportunity to listen to some of the best national and international university professors. In addition to regular academics, extracurricular and cocurricular activities such as quiz competitions and fine arts are also conducted online for our students," remarked Dr Hanumantharao, principal, Matrusri Engineering College.

Colleges in both the states have realised that a multi-pronged strategy is necessary to manage the current Covid-19 crisis and build a resilient online learning system. At the same time it is important to reconsider the current delivery and pedagogical methods by seamlessly integrating classroom learning with

e-learning modes to build a unified learning system.

In the process of building a unified learning system which integrates delivery, engagement and assessment, Gokaraju Rangaraju Institute of Engineering and Technology at Hyderabad has developed an in-house enterprise solution that enables online learning easy for all the stakeholders. "Our solution has features to automate scheduling of classes, manage online teaching, attendance and automatic recording of lectures. These lecture videos help students from rural backgrounds to watch them at their convenience since they may suffer with bandwidth issues during the online lecture," said Prof P. Gopala Krishna, Dean, Publicity, Gokaraju Rangaraju Institute of Engineering and Technology.

At the same time this college has adopted a blended learning model to ensure quality in content delivery. "Blended learning is a well tested online pedagogy for better student engagement. Online teaching should not only limited to deliver the content online to the students using some online meeting platforms. This mode of online teaching should address all the students' concerns with seamless integration of technology into the content delivery system," added Krishna.

In order to equip their students with the latest in innovation and technology, all the colleges of the Annamacharya Education Trust (AET) in Andhra Pradesh have introduced new courses in Artificial Intelligence, machine learning, data sciences, etc. "We believe in training our faculty regularly and motivating our students. We hope for better internet facility in rural areas of the state to conduct seamless online classes for our students in rural areas," said Gangi Reddy, Chairman of the Annamacharya Educational Trust.

GRIET: A place of quality education

Gokaraju Rangaraju Institute of Engineering and Technology (GRIET), established in 1997 under the patronage of the Gokaraju Rangaraju Educational Society, is an AICTE approved and permanently-affiliated college with UGC Autonomous status under JNTUH, Hyderabad. Following its mission to achieve and impart quality education with an emphasis on practical skills and social relevance, GRIET's endeavor has been to create a conducive teaching learning environment supported by qualified staff from academia and industry, infrastructure and support facilities. It offers nine UG programmes in BTech and six PG programmes in M.Tech. Six BTech programmes and four PG programmes are accredited by NBA. The institute is accredited by NAAC with 'A' grade. GRIET is one of the few private engineering colleges to be selected for

World Bank's TEQIP-II grant. GRIET is ranked at 172nd place in NIRF 2020 released by Ministry of Human Resources and Development, Government of India. GRIET is also ranked as best Engineering College in Telangana by THE WEEK, the Times of India, India Today, the Chronicle, Education World, Competition Success Review and ELETs DL Magazine. GRIET is one of the preferred colleges considering its career achievement record by students in terms of placements, higher education within and outside country and entrepreneurial attempts, publications, research facilities especially in the area of material characterisation at high temperature, conduct of national and international conferences, workshop FDPs. ISTE, AP chapter has recognised the college more than once in terms of best student, best teacher, best principal and best college.

Dr. K.P. Srinivas Rao,
Chairman,
Matrusri Education Society

Matrusri Education Society (MES) was established in 1980 by a group of farsighted and distinguished engineers, doctors, lawyers, businessmen and administrators as its members with a lofty vision and mission of imparting technical education of the highest standards to the students. Engineering is a stream of education which involves the application of Science and Technology and

Mathematics to innovate, design and develop new products and services. With this foresight, in 1981, the society started Matrusri Venkata Subba Rao Engineering College (MVSREC), one of the top ranking institutions in the country. Reinforcing the society, it established Matrusri Engineering College (MECS) in the year 2011. MES also sponsors Matrusri Institute of Post Graduate Studies (MIPGS), which offers MBA programme. The prestigious society encourages its experienced and learned teachers to adopt innovative methods in teaching. It also appreciates and presents gold medals to its students who get university level ranks every year.

MVSREC and MECS cater to the needs of Indian industries for trained technical manpower with practical experience and sound theoretical knowledge. They impart quality-based and value-ori-

ented education with a vision of enriching the students with the latest advancements in technology. The institutions aim at continuous improvement in all activities and abide by a promise to provide efficient engineers with a social, Intellectual and academic foundation and have been accredited by prestigious bodies like National Board of Accreditation (NBA) and ISO for their excellent management system.

Advanced technologies like OH projectors, Google Classrooms, E-Classrooms, Digital Library, Wi-Fi facility and the state-of-the-art laboratories are provided to the students apart from the regular classroom teaching. The institutes emphasize on social activities like NSS and NCC involving students as well as faculty members. Students are encouraged to participate in a Society Outreach Program like Unnat Bharat Abhiyan, a flagship program of Ministry of Human Resource Development (MHRD), Govt. of India. Industry-Institution Partnership Cell (IIPC) was established in both the institutions to reduce the gap between industry expectations and academic offerings by the direct involvement of industry to attain a symbiosis. The career guidance and placement departments of both the colleges aim to provide continuous placement and internship programmes, language learning and technical training sessions to enhance the employability skills of the students. Many students are placed in top companies like Cognizant, Tech Mahindra, Hitachi Consulting, TCS, ValueLabs, Infosys, Wipro, Virtusa, Robert Bosch and Amazon.

Aditya Group of Institutions: Andhra Pradesh

Dr. N. Sesa Reddy
Founder, Aditya Group
of Institutions
Andhra Pradesh

Under the able guidance of Dr. N. Sesa Reddy, the founder of Aditya Group, it has made its entry into the educational field with a public school to meet the needs of primary and secondary education. In succession, Aditya established a number of public schools, international schools, junior (+2), degree, PG, engineering, polytechnic, pharmacy, nursing and teacher training institutions.

Aditya Educational Institutions (AEI) was established in 1984 with a sublime thinking of providing quality education from KG to PG level. Under

Aditya Professional Educational Campus was established at Surampalem near Kakinada in 2001 with Aditya Engineering College. Today, Aditya, Surampalem Campus, stands tall and proud, with 12 professional colleges for engineering, polytechnic, pharmacy, management, physical education with a student strength of 15,000+ in 180 acres of pollution-free and lush green landscaped surroundings.

Mr. N. Satish Reddy, son of Sri N. Sesa Reddy, has completed his MBA degree in Australia and taken charge as Vice Chairman of Aditya Group of Educational Institutions. He has been looking after the Surampalem Professional Educational campus since 2006.

During the tenure of Satish Reddy as Vice Chairman, the Surampalem Professional Educational Campus has become one of the preeminent professional institutions in India by providing excellent academics, placements, infrastructure, transport and hostel facilities.

Aditya's Technical Hub is an in-house corporate style training unit. The T-Hub uses methods that help every student to be involved with the class and practically experience the technology that is very much essential for the present corporate companies. Our students are trained to overcome whatever obstacles come their way by thinking outside the box.

Aditya has its own campus hostels separately for boys and girls with good infrastructure and modern facilities like well-ventilated spacious marble floor rooms with AC and Non AC, attached bath and balcony in each room, 24 hrs security, biometric system, CCTV Cameras, study table for each student. There is an exclusive library, 100 resident faculty and regular study hours. Also available: free wi-fi, hygienic food (separate for north and south students), medical care, playground, well-equipped gym, bank and eight ATMs.

For further details about Aditya, visit www.aditya.ac.in and www.aec.edu.in

Vignan Group of Educational Institutions

VIGNAN'S
Foundation for Science, Technology & Research
(Deemed to be UNIVERSITY)
- Estd. u/s 3 of UGC Act 1956

ABOUT DR. LAVU RATHAIAH, CHAIRMAN: VIGNAN GROUP OF EDUCATIONAL INSTITUTIONS

Dr. Lavu Rathaiah

of students placed under his care, he has blazed the path for many more educationists in the State.

Thanks to the successful model introduced by him, today A.P students are in the forefront of all competitive exams and joining premier national institutions through IIT-JEE, EAM-CET, besides public services like UPSC.

Vignan Group of Institutions is known for its honest and organic growth. Under the able stewardship of Dr. Rathaiah, the Group has been rendering yeomen service for more than

four decades now to a wide cross section of students from KG to Ph.D. His commitment to qualitatively change an earlier ineffective system into a dynamic and outcome oriented learning environment has brought about a paradigm shift in the educational scenario of Andhra Pradesh and Telangana.

Since 1977, the Group has been working tirelessly, with commitment to ensure that every student entering the portals of Vignan is provided with a strong foundation to pursue his/her life goals with academic rigour and transform into a multi-faceted professional.

Vignan's Foundation for Science, Technology & Research (VFSTR) is the flagship institution of the group. Student community at VFSTR is multicultural with a sizeable section coming from other states of India as well as abroad. Campus life is highly vibrant, with a well planned and meticulously executed curriculum, outcome oriented Teaching-Learning practices, Co and extra-curricular activities, outreach programmes, semester-long industry internship and international student-exchange programme, all of which aid in the holistic development of students, in tune with the institution's vision of preparing knowledgeable and skilled global professionals who are psychologically strong and emotionally balanced, which is also reflected in the New Educational Policy of India.

College of Engineering & Technology

Autonomous
NH-40, NANDYAL - 518501, KURNOOL - Dist. A.P.

Dr. M. Santhiramudu
Chairman

- Established in 1995.
- Approved by AICTE, Affiliated to JNTUA, Ananthapuram.
- Autonomous conferred by UGC.
- World Bank funded Institution (TEQIP-1)
- Colleges with Potential for Excellence (CPE) status from UGC.

Accreditations

- Placed in 251-300 Rank Band in National Institutional Ranking Framework (NIRF)-2020 by MHRD, Govt. of India
- Received "A+" Grade from NAAC of UGC, New Delhi.
- Received TIER-1 NBA accreditation by National Board of Accreditation, New Delhi.
- Established Institute Innovation Council (IIC) by MHRD, Govt. of India
- ISO:9001:2015 Certified Institution. > TCS accredited Institution.
- Approved Technical Skill Development Institution (TSDI) by Government of A.P, in association with SIEMENS.
- DDU-KAUSHAL Kendra by UGC for skill upgradation.
- Ranked 96th among all top 128 Engineering Colleges in India by "THE WEEK" Magazine issue 16 June 2019.
- Ranked 34th among all top 107 Engineering Colleges in South zone by "THE WEEK" Magazine issue 16 June 2019.
- Ranked 2nd among all Top Private Engineering Colleges in A.P by "COMPETITION SUCCESS REVIEW" July 2020.
- Ranked 143rd among 200 Private Engineering Colleges in India by "INDIA TODAY" Magazine issue 06 July 2020.
- Ranked outstanding Engineering Colleges of Excellence in India by "COMPETITION SUCCESS REVIEW" July 2020.
- Ranked 134th among top Private Engineering Colleges in INDIA by "THE TIMES OF INDIA" news paper dated 03 Aug 2020.
- Ranked 28th among top 50 Engineering Institutes on research capability in India by "TIMES ENGINEERING SURVEY" 2018.
- Ranked 61st in "DATA QUEST" top private T-schools 2020 issue March 2020.
- Ranked 73rd in "DATA QUEST" top 100 T-schools 2020 govt and pvt issue March 2020.
- AAA+ Ranking by "CAREERS360" Magazine April 2020.

Courses offered

UG Engineering Programs

- Civil Engineering
- Computer Science & Engineering
- Electronics & Communication Engineering
- Electrical & Electronics Engineering
- Mechanical Engineering
- Computer Science and Engineering (Data Science)
- Computer Science and Engineering and Business Systems

PG Engineering Programs

- Computer Science
- Power Electronics
- Structural Engineering
- Machine Design
- Embedded systems
- MBA
- MCA

Doctoral Programs

- Electrical Engineering
- Mechanical Engineering
- Electronics & Communication Engg.
- Civil Engineering
- Mathematics
- Management Studies
- Physics

Salient Features

- Excellent Infrastructure and Instructional facilities.
- 60 lakh rupees sanctioned under FIST program from Department of Science and Technology, Govt of India.
- 2.98 Crores Research Projects are going on in the Campus
- More than 90% Placement among eligible candidates.
- Good Academic performance with 11 JNTU Gold Medals.
- Campus Wide Networking with WiFi connectivity.
- Special Coaching for GATE, Communication and Soft Skills by Professional Agencies to improve employment opportunities.
- Hostels for Boys, Girls and Faculty Quarters with in the Campus.
- e-Class Rooms - Digital Library with 280 Mbps leased line, free internet facility & Digital class rooms.
- Central Library with more than 74,311 Volumes of Books & 243 National / International Journals.
- Facilities: Transport, Canteen - Sports - Gym - SBI online branch With ATM - Post Office.
- Student chapters namely CSI, ISTE, IETE, IE(I), SSHMA (hmaindia.net) NPTEL.
- Institutional membership of CSI, ISTE, IE(I), HMA, ISTD, IETE.
- Industry Driven / Aligned curriculum. IIT Bombay remote centre for ICT.
- Strong Alumni support for placements, Higher education and research.
- Introduced STEP program in association with The Hindu.
- The APSSDC has sanctioned 03 CM skill centres to our Institute. 1. IoT & Gaming development 2. Dassault systems 3. Indo-European skilling centre.

RGM COLLEGE OF ENGINEERING AND TECHNOLOGY (AUTONOMOUS) NANDYAL, ANDHRA PRADESH

Dr. M. Santhiramudu
Chairman

Rajeev Gandhi Memorial College of Engineering and Technology was founded in the year 1995. It is located in a 32.04 acre sprawling campus on NH-40 at Nandyal, Kurnool (Dist), A.P. It is the dedicated commitment and efforts of our Chairman, the man with vision "Vidharathna" Dr. M. Santhiramudu, who started the institution with a motto "EDUCATION FOR PEACE". RGM CET is a road of elegant educational journey, yet path-breaking in different dimensions.

The institute is offering 07 Bachelor of Technology courses, 05 Master of Technology courses and 07 Doctoral Programs in various departments apart from Master of Business Administration (MBA) and Master of Computer Applications (MCA) of JNT University, Anantapuramu. The intake of institute per annum is 1101. The institute has excellent infrastructural facilities and instructional facilities. The institute has 280 Mbps internet connectivity to cater the needs of faculty, students and research scholars. RGM CET has an excellent library with more than 74,311 volumes, 144 National journals and 99 international journals. It is a member in IEEE, ASME, ASCE, Taylor and Francis, DELNET and INFILBNET digital libraries.

Our college has been placed in 251-300 Rank band in Nation-

al Institutional Ranking Framework (NIRF) -2020 by MHRD, Govt. of India. Institute is accredited by NAAC with A+ grade with a score of 3.54 out of 4.0 CGPA. B.Tech course are re-accredited by NBA in TIER - 1 Category in 2020. The institute has been accredited by TCS for placements. The Institute was Selected for World Bank assisted TEQIP-I for quality improvement. The institute is 9001:2015 certified.

The Institute has been sanctioned DDU- KAUSHAL KENDRA by UGC for skill up- gradation in 2015. The Institute has been conferred Colleges with Potential for Excellence (CPE) by UGC, New Delhi in 2016. The Institute has been recognized as "Technical Skill Development Institute" (TSDI) by Government of Andhra Pradesh in association with SIEMENS INC in 2016. The APSSDC has sanctioned three CM skill centers for our Institute to improve skills among students. they are 1. IoT and Gaming development 2. Dassault Systems 3. Indo-European skilling centers for Mechatronics and Industrial Robotics. Established Institute Innovation Council (IIC) by MHRD, Govt. of India. Selected as nodal center to conduct online courses offered by IIRS-ISRO, Dehradun.

So far in the last 25 years of existence, 21 Batches of Students were Graduated with an average results of 85 to 90% and secured 11 Gold Medals in total from the University. Majority of our students have been placed in well reputed companies not only in India but also abroad. Research projects worth of Rs 2.98 crores are going on in the campus.

Annamacharya Institute of Technology and Sciences, Rajampet: Redefining Engineering Education in the state of Andhra Pradesh

Shri. C. Gangi Reddy
Founder

Accclaimed as one of the best engineering colleges in the state, Annamacharya Institute of Technology and Sciences (Rajampet) is the first college founded by Annamacharya Educational Trust in 1998 with a noble vision commissioned to raise technocrats and managers of high academic standards and character nestled with a desire to serve the humanity. The guiding force that propelled the college towards development and success was the vision of Shri. C. Gangi Reddy, the Founder, to offer global standard education in rich ambience and state-of-the art infrastructural facilities that define the course of a new era in higher education.

AIMS Rajampet enjoys Autonomous status by UGC, NAAC Accreditation and Institution of Engineers (India) accreditation.

The college was accredited twice by National Board of Accreditation. The college was also chosen as Andhra Pradesh State Skill Development Centre. SIEMENS Technical Skill Development centre was granted with a whopping financial aid of Rs 2 crore. The local youth and our students are receiving training advanced technologies through the

center. Recently, CM's Centre of Excellence has been established on the campus. The affiliating JNT University Anantapuramu, granted Research Centre in Mechanical Engineering in 2014. IBM Centre of excellence on the campus offers various certification programmes. IEEE Student Chapter was inaugurated in the year 2011 to expose the students to latest technologies. IE(I) student chapter and ISTE student chapters are also very active on the campus.

About The Founder Sri Choppa Gangi Reddy:

Mr C. Gangi Reddy, Founder of Annamacharya Group of Institutions, hails from Tallapaka, the birth-place of Sri Annamayya. He evinced a great interest in education.

His dream to establish an educational institution that offers quality education was realised in the year 1998 when Annamacharya Institute of Technology and Sciences was started near Tallapaka, Rajampet.

Under his leadership, AITS Rajampet has become much-sought-after college in Rayalaseema region. CGR expanded his service to the society.

ANURAG UNIVERSITY READY TO MAKE TOMORROW.

Anurag, today is widely recognized as a name that stands for quality education and the starting point of a great future. The journey of Anurag University began over two decades ago in Hyderabad, when Dr. Palla Rajeshwar Reddy, Chairman and a visionary leader, established Lalitha Degree college in 1998. He expanded the scope of education he instilled, as he went on to establish CVSR College of Engineering in 2002, Lalitha College of Pharmacy in 2005, and then integrated CVSR, Lalitha degree and pharmacy colleges into Anurag Group of Institutions in 2010. With all these institutions building the futures of thousands of students each year, in 2020, Anurag Group of Institutions earned the status of a private university.

Good education is always recognized. Accreditations validate the quality of education of an institution. At Anurag University, all the B.Tech. and B.Pharm. courses are accredited by NBA. It is also accredited by NAAC in A grade. It is Telangana's top private institution and is ranked 180th in engineering, in the 76-100 band in pharmacy, and in 151-200 band in the overall category in NIRF 2020.

Dr. P. Rajeshwar Reddy
Chairman

Today, Anurag University offers 14 undergraduate, 13 postgraduate and 9 doctoral programs in Engineering, Pharmacy and Management. The world is evolving fast, and so are the demands for professionals of tomorrow. To meet them, AU became the first to offer emerging courses like AI and ML, Data Science and Systems Engineering. The university is also looking beyond today, and is planning to introduce the schools of liberal arts, agricultural science, medicine, law and journalism in the near future.

With a history of building futures, AU has consistently placed students at some of the biggest names in the industry. With over 150 recruiters on board, the university has a record of 100% placements with 7.2 LPA being the highest offer. Further, the University collaborates with various institutions for research and development projects. It has MOUs with hundreds of software and core companies to bridge the gap between the Industry and Institution. This association has enabled industry experts to give guest lectures and facilitate interactive workshops, seminars, brainstorming sessions, technical discussions, etc.

Faculty is the backbone of any university. Anurag University has over 400 professors, including 100 doctorates. All the faculty members are trained continually to industry-leading standards and to deliver outcome-based education (OBE). All this is possible under the able leadership of Dr. U.B. Desai, Chancellor, who brings to bear over 40 years of rich experience in teaching, research and administration at various global institutions. He was the founding director of IIT, Hyderabad. Further, Dr. S. Ramachandram, Vice-Chancellor, is another luminary in our

The ICTIEE Inaugural Event

academic leadership. With over 35 years of experience in teaching, research and administration in well-reputed education institutes all over south India, he served as the VC of Osmania University. Joining them in the leadership team is Dr. S. Sameen Fatima. She has over 37 years of experience in teaching, research and administration in Osmania University,

University of Hyderabad, BITS and UMass at Amherst, USA.

The infrastructure at AU is truly world-class. With a 55-acre campus and 10 lakh sq.ft. of built up area, the university is vast and inspiring. AU is surrounded by green pockets for the students to relax and connect with nature while learning.

It also has a provision of 100% hostels for the students to experience quality education in campus.

With a rapidly changing business, technological and social landscape, the world constantly throws new challenges at us. Innovation, preparedness and character will be key to face these challenges of tomorrow. At AU, we believe in equipping our students for these unknowns that tomorrow may bring to them. We offer multidisciplinary courses, help develop a wider perspective, and inspire out-of-box approaches. So, every student that walks through these gates can make a tangible impact on tomorrow.

WORLD-CLASS INFRASTRUCTURE AND LEARNING TOOLS

BASHA MOHIUDDIN
Founder & Chairman

Established in the year 2003, **Lords Institute of Engineering & Technology** is today one of the leading Muslim Minority Engineering Institutions in the Country. The Institution is Approved by AICTE, Affiliated to Osmania University, Accredited by NBA (three times) and Accredited with 'A' Grade by NAAC. Starting from a humble intake of about 180 students, the Institution today caters to the Academic Interests of about 3000+ students across the fields of Engineering & Management.

A 10 min drive from the IT Hub of Hyderabad, the 12 acre campus of Lords is replete with World Class Infrastructure and Learning Tools for the students. Over 1,000 latest configuration computers, 40,000 books, 62+ Research Laboratories and Centers of Excellence facilitate learning on the campus. Our globally trained faculty leverage the facilities on offer and help the students ideate, innovate and create, thereby leading to patented technologies. Few of the innovative projects done by our students to tackle Covid 19 includes Drone Sanitizer, Mist Sanitizer, Touchless Sanitizer, Curren-

cy Sanitizer etc. Other innovative projects our students have done in the last two years include spherical bike, automated scavenging unit, potable water generation from air, acetylene bike, light emitting concrete, bamboo mud concrete, septic tank for rural communities etc.

At Lords, we encourage our students to compete and benchmark themselves against the students from all across the World. Participating in International Competitions held in Malaysia, Russia, Brazil, USA among others and Domestic Competitions have helped our students bring laurels to the Country and Institution. Our student has won Best Paper award at an International Conference in Malaysia 2019, beating competition from Turkey and China.

Lords is leveraging its capabilities to nurture the institute as one of the best in the region. The idea is to facilitate learning through initiating, exploring and experimenting in a conducive environment. Lords was founded with a mission to promote excellence in the field of technical education and to provide quality training. Our campus is a rare blend of serene environ, well-equipped infrastructure and a faculty enriched with technical knowledge. We strive to give professional education a new perspective and achieve perfection.

This gratifying ambiance nurtures our students to be passionate about learning and explore new realms of wisdom.

STANLEY COLLEGE OF ENGINEERING AND TECHNOLOGY FOR WOMEN

Stanley College of Engineering and Technology for Women, an NBA & NAAC-A grade accredited institution was established in 2008 on the lush green campus of the historic Stanley College at Abids, Hyderabad. A not-for-profit engineering college was founded by Mr K. Krishna Rao with the support of Methodist Church in India. The college is approved by AICTE, New Delhi and affiliated to Osmania University, Hyderabad. Within a span of 12 years, the college has applied for the Autonomous status and has been ranked as one of the premier most Women's Engineering Colleges in the country. This rapid progress is testament to the leadership and the various institution building activities undertaken at Stanley.

In line with its aspiration to serve as a role model for institutional excellence in higher education, Stanley has made significant progress towards achieving goals through its experienced faculty, industry-oriented courses, research centres and industry relations. Stanley is driven by brilliant faculty who have an unparalleled reputation for excellence and dedication to students. The faculty of Stanley constantly strives to keep abreast of the market and industry demands and accordingly equip the students to meet the requirements. Stanley is deeply committed to its core institutional values of interdisciplinarity and innovative pedagogy; pluralism and rigorous scholarship; and research ó

K. Krishna Rao, founder

methods, coupled with intensive laboratory training, help the students excel. Interactive sessions, seminars, certification courses and workshops also play a major role in training young engineers. Stanley offers undergraduate courses in Artificial Intelligence & Data Science, Computer Engineering, Computer Science & Engineering, Electronics & Communications Engineering, Electrical & Electronics Engineering, and Information Technology and postgraduate courses in CSE, ECE and MBA.

Stanley subscribes to the idea of employability of its students and hence the college has designed training modules from the 1st year itself. From career planning through counselling to exploring personal interests, aptitudes, and abilities to professional development through employability linked training to learning about corporate grooming – Training & Placement Cell creates opportunities to develop essential skills and explore the world of employment and new career avenues.

PAGE LORDS ACADEMY and innovation. Internships, coupled with classroom inputs, shape the young minds to meet the contemporary needs of the society. Innovative teaching

Lankan labyrinth

A man dies in Coimbatore and leaves a trail leading to Colombo. The R&AW and the Tamil Nadu Police seek to establish if he was history-sheeter Angoda Lokka

BY LAKSHMI SUBRAMANIAN

AROUND THE TIME Sri Lankans gifted the Rajapaksa clan a landslide victory in the national elections in early August, the Tamil Nadu Police were hot on the trail of a crime story with roots in the island nation. Investigators suspect that a Sri Lankan history-sheeter, with links to the underworld and ambitions of being an actor, had been hiding in India for about three years. He was apparently running his drug network in Sri

Lanka through WhatsApp.

It all started on July 3, when a Pradeep Singh died of cardiac arrest in Coimbatore. Curiously, even the police seemed to have been ignorant about the life and death of Angoda Lokka, originally Maddumage Lasantha Chandana Perera, until a journalist raised a question at a briefing, quoting a Sri Lankan newspaper. Lokka, aka Pradeep Singh, was reportedly living in a rented house at

Cheran Ma Nagar on the outskirts of Coimbatore.

"He was here for the past one-and-a-half years," Inspector General of Police (Crime Branch Criminal Investigation Department) K. Shankar told THE WEEK. "The investigation is going on. We have taken Amani Thanji and Sivakami Sundari, who were with him, into custody. We will have to ascertain the facts."

He added that Sri Lankan officials had not sought any details about Lokka yet. "Once they request, we will definitely share it," he said. Sources said that investigators have asked Sri Lankan law enforcement agencies for Lokka's fingerprints and DNA samples.

Apart from the CB CID, which has formed seven special teams for the case, the Research and Analysis Wing is also involved, and has held marathon meetings with the police.

According to case details THE WEEK accessed from Angoda, Lokka's hometown just outside Colombo, the 35-year-old was a drug peddler and an underworld operative with several murders to his name. His first arrest was on January 18, 2011, for a murder committed within Wellampitiya police station limits. Several other murder cases followed. Then, in 2017, after a bus shooting in Kalutara that he was suspected to have engineered, Lokka went missing.

Soon after Lokka went missing, the Interpol issued a Red Notice against him. "We could not trace his whereabouts," said a source in the Sri Lankan police. The source said that he had fled the country on a fake passport. It is not clear if he came to India directly.

On September 25, 2019, history-sheeter Konda Tharaka was shot dead at Hanwella, about 30km from Colombo. The shooters were allegedly Lokka's associates; police suspected that he stayed in touch with them through WhatsApp calls. "He is the

PHOTOS RATANKUMAR

prime suspect in the Tharaka murder case,” said Deshabandu Tennakoon, deputy inspector general of police, Western Province.

After arriving in India, Lokka stayed in Bengaluru for a few months and then in Madurai. His final stop was Coimbatore, where he first lived in Saravanampatti and then in Cheran Ma Nagar. He had been living in the last location for at least three months, police sources said.

“He landed first in Bengaluru with his fake passport and forged documents,” said a police source. “He took the help of T. Sivakami Sundari, a lawyer from Madurai. He was referred to her by a Sri Lankan friend living in Dubai.” He then moved to Tamil Nadu. Sivakami, who had friends in the Sri Lankan refugee camp near Madurai, reached out to a Thiyaneswaran for help; together, they got Lokka an Aadhaar card and other documents under the alias Pradeep Singh.

Lokka then moved to Saravanampatti. Thanji, 27, began flying in from Colombo to visit him here. Reportedly, she was married to one of Lokka’s rivals, whom he had allegedly bumped off years ago. When Thanji’s

visits made neighbours suspicious, the duo moved to Cheran Ma Nagar.

Thiyaneswaran helped them rent a house owned by an NRI living in the US. They moved in in March 2020. Thiyaneswaran had apparently told the owner that the two were from Dubai and were stuck in Coimbatore because of the pandemic.

Sources said Lokka was earning a living in Coimbatore by supplying protein supplements to gyms in the city. And, unlike in Saravanampatti, no one noticed the couple in Cheran Ma Nagar, largely because of the lockdown. However, a few neighbours had seen Lokka smoking and talking on the phone in his balcony, and walking the quiet streets.

On July 3, however, Lokka reportedly had a cardiac arrest. Thanji and Thiyaneswaran took him to the Coimbatore Medical College Hospital (CMCH), where he died. His name was recorded as Pradeep Singh.

The following day, Sivakami rushed to the Peelamedu police station, identified herself as Singh’s relative and took the body for cremation in Madurai. By this time, the Sri Lankan police had been tipped off.

Meanwhile, the Coimbatore City

HIDDEN ABODE

A team of CB-CID conducting a search at Green Garden in Cheran Ma Nagar where Lokka stayed; (above) Amani Thanji

Police found that the Aadhaar card was fake and they arrested Sivakami, Thiyaneswaran and Thanji. The local police seized all electronic devices used by them, and handed the case over to the CB CID. The police, however, said that Lokka’s phone and laptop had been wiped clean.

While Sivakami and Thiyaneswaran have been remanded to judicial custody, Thanji is in Puzhal prison near Chennai. In a twist, Thanji was first taken to the CMCH; she was two months pregnant, and the pills taken to terminate it had caused profuse bleeding.

While the Sri Lankan police said that Lokka had recently undergone rhinoplasty, ostensibly to get acting gigs, the Coimbatore police dismissed it as speculation. They also said it was difficult to establish whether he did go under the knife and even whether the man who died was indeed Lokka. The CB CID might isolate his DNA from blood samples collected during autopsy.

Meanwhile, Sri Lankan authorities said they have approached Indian authorities, seeking more details about Lokka and his aides. “Our state intelligence officials,” said Tennakoon, “have approached the Indian High Commission in connection with Lokka’s death.”

BEST COLLEGES IN INDIA

THE WEEK-HANSA RESEARCH SURVEY 2020

* COMPOSITE SCORE = PERCEPTUAL SCORE (OUT OF 600) + FACTUAL SCORE (OUT OF 400)

Covid-19 has hit the Indian education sector hard. As nobody was prepared for such an eventuality, institutions scrambled for the only exit door in sight—online education. India's top colleges knew that the experience they provided in their classrooms could not be replicated online, yet. But they had to find ways to impart learning with available tools.

Apart from posting lectures and material online and sharing recordings through WhatsApp groups, the faculty at Lady Shri Ram College for Women (LSR), Delhi, taught individual students over the phone, to

ensure that no one was left behind because of accessibility constraints. Suman Sharma, principal, LSR, said teachers were also taking online courses to hone their remote-teaching skills.

"Along with imparting curriculum education, we also (address) the adverse impact of this pandemic," she said. "Safety measures are discussed actively and faculty members take special care to ensure that students remain positive. Some faculty members, who are trained psychologists, are counselling students to help them navigate these challenging times. This dialogue is immensely useful and fosters a sense of community even though there is no physical presence of students in college."

Loyola College, Chennai, recently set up a help desk to address emergency needs of staff and students. It arranges medicines for the staff and their family, and food and counselling for the students who are

stranded. The college works with state government officials to deliver these emergency services.

The college has developed its own learning management system. "The Loyola Learning Management System is almost on par with any other learning management system like Google Classroom," said Reverend Thomas Amirtham, principal, Loyola College. "It has been exhaustively explored to create classes, share class notes and conduct assessments of students. Most of the teachers have realised their dual role as teachers and learners as they have enrolled themselves in various online programmes."

At IIT Bombay, the education technology department—which spearheads research on pedagogy and online education—is streamlining the in-house process. The institute also runs the massive online open course (MOOC) programme; MOOCs are aimed at unlimited participation and

open access via the web. "Hence, there is enough in-house experience on online education," said Subhasis Chaudhuri, director, IIT Bombay. "We are now training other faculty members and teaching assistants on how to make the best use of currently available technologies to maintain the high quality of education that we stand for. It is not going to be easy, neither do we want our students to suffer. Our faculty members will dedicate themselves even more during the forthcoming semester for the benefit of our students."

Most of the premier institutes have introduced innovations to elevate online education. "To overcome the monotony and to bring in variety in teaching, we have been using techniques like flipped classroom (an instructional strategy focused on student engagement), blended learning, group discussions, assignments, self-study and project-based learning," said Rajendra D. Shinde, principal, St. Xavier's College, Mumbai. "Since online lectures allow us to bring in visiting faculty, we have encouraged our (lecturers) to invite guest speakers for topics relevant to research and industry."

The college is also looking to organise extra-curricular programmes

like the college fest online. "Our students will miss the exposure they get through such programmes," said Shinde. "The pandemic has offered new challenges to our students to use their creativity for online versions of these programmes. I am sure this experience will enrich them in digital transformation and techniques."

Hansraj College, Delhi, has crowdsourced a strategy for the next semester's classes. Based on recommendations and suggestions from different departments, the college conducted a comparative analysis of different options of online teaching (both paid and free) and settled on the Microsoft Teams platform. Unique IDs for students and teachers will keep uninvited attendees out. It is also organising training sessions for the faculty.

The college principal, Rama, who uses only her given name, said that the college was developing "student-friendly" assessment tools that would challenge their application skills, something that traditional tests do not do. "Though the online system of teaching and learning has been around for more than a decade, the situation till now has not warranted a complete reliance on it," she said. "While we hope the situation

PROACTIVE MEASURES

Students at Hansraj College, Delhi (file photo). The college has developed student-friendly assessment tools

improves at the earliest, we shall continue teaching in the medium best suited to the requirements of our students." The college is also organising webinars on stress management, yoga and meditation.

India's education hubs are also metros; the pandemic hit these centres hard, forcing colleges to take their admission process online. "Our admission will be based on an online entrance test," said Shinde of St. Xavier's, Mumbai. "We have hired an agency to implement these entrance tests and students can take the test from their homes. Malpractices, if any, will be taken care of by an Artificial Intelligence technology."

At IIT Bombay, admission to degree programmes are decided by GATE scores (Graduate Test in Engineering). As GATE exams were completed before the lockdowns started, students were spared the confusion. For research programmes such as PhD, the departments conducted extensive online interviews. The list of successful candidates is now ready.

Some colleges were already using online admission systems. For example, Loyola, Chennai, has had it since 2013. For some courses, it also conducts an online aptitude test. The college also plans to hold interviews through apps like Google Meet; marksheets might be verified through a system similar to DigLocker. For most top colleges in Delhi, higher secondary marks are the sole basis for admissions.

The challenges posed by the pandemic are not going to end with admissions or with redesigning the curriculum. As many sectors have been hit hard, colleges will need to do a lot more to prepare students for

AMEY MANSABDAR

HOLISTIC DIGITISATION

Students at St. Xavier's College, Mumbai (file photo). The college is looking to organise extra-curricular programmes online

the post-Covid scenario. Many institutes are preparing courses focused on emerging areas like fintech, block chain, data analytics and machine intelligence. As online media outlets and online transactions continue to grow, courses in multimedia and animation are being upgraded. Interestingly, courses related to psychology like master's in lifespan counselling are also in demand, perhaps because of the impact that the pandemic has had on mental health.

The government's New Education Policy 2020 was introduced into a world of shifting paradigms. Experts said that the move to introduce online courses in liberal arts was much needed in India. Having major and minor subjects will help learners to customise their courses. Multiple entry and exit points are also a good idea. However, replacing UGC and other higher bodies with a single authority seems a difficult task, said Shinde. "Of course, the big question remains how and when will this policy be implemented? The success of NEP lies in it being implemented with care, precision and accuracy."

Pratibha Jolly, former principal, Miranda House, Delhi, and academic consultant to the National Assessment and Accreditation

Council called the NEP progressive and ambitious. It is a vision document, she said, that seeks to not just reboot and rebuild the education system "but reimagine, redefine and re-engineer every aspect of support for lifelong learning". However, she, too, agreed that the challenge lies in laying a clear roadmap and rolling it out firmly with prioritised plans for implementation.

She added that the top colleges and universities have enough experience, professional competence and acumen to immediately shift to the new paradigm. Jolly added that while awaiting the rollout of the new policy, for confidence building, some existing challenges can be quickly addressed with enabling actions. For instance, while the choice-based credit system sounded good on paper, even the best of institutions could not implement it in letter and in spirit.

"Individual choices of subject combinations simply could not be given because of resource and infrastructure constraints," she said. "Institutions always looked for an optimum number of students before allowing a combination to be offered. There was then no room for the singular student who wanted to pursue

physics with music, or chemistry with culinary arts. With the establishment of the Academic Credit Bank, institutions can easily create such opportunities for learning."

While colleges are preparing to begin an academic year under the shadow of Covid-19, they are eagerly looking forward to having students back on campus. "A college is a vibrant space because of its students," said Sharma of LSR. "We are exploring multiple options to encourage students to participate and feel a sense of belonging. We have a host of societies that are planning online events and students are actively participating as they prepare videos for those events and display their talent. These are humble attempts at recreating the campus experiences, given the circumstances. However, we cannot wait for the campus to fill with the energy of our students again, as soon as it is possible to do so safely." Chaudhuri of IIT Bombay said: "The life, peers, the discussions, the culture and the engagements, apart from the academics, set IITB apart. The faculty does not want to stare at the laptop and give lectures. We want our students back on campus as soon as the pandemic is over. I hope we do not have to wait too long." 📌

THE LNM INSTITUTE OF INFORMATION TECHNOLOGY, JAIPUR

(Deemed-to-be-University, under Section 3 of UGC Act 1956)
A joint venture of Lakshmi & Usha Mittal Foundation and Govt. of Rajasthan
NAAC Accreditation - 'A' Grade | AICTE Approved Engineering Programmes

UNDERGRADUATE ADMISSION 2020

PROGRAMMES OFFERED

B. Tech.

- Communication and Computer Engineering (CCE)
- Computer Science and Engineering (CSE)
- Electronics and Communication Engineering (ECE)
- Mechanical Engineering (ME)

B. Tech.-M. Tech. (5-Yr. Integrated Dual Degree)

- Computer Science and Engineering (CSE)
- Electronics and Communication Engineering (ECE)

MODE OF ADMISSIONS

JEE Mode: Based on JEE (Main) 2020 score.

DASA Mode for International students (Foreign Nationals/NRIs): Based on valid SAT score.

For detail about Eligibility criteria, Last date of application, Preparation of merit list etc. please visit the admission website at <https://admissions.lnmiit.ac.in/ugadmissions/>

WHY LNMIIT?

Placement 2019-20 (as on June 2020, ongoing)

(for detail visit: <https://placements.lnmiit.ac.in/>)

- 92% of registered eligible students are placed.
- **Highest Package:** 63.27 Lakh per annum (CTC).
- **Average Package:** 12.03 Lakh per annum (CTC).
- More than **50% students** got 10 Lakh per annum (CTC) or more.

Scholarship and Assistantship Opportunities

- Various scholarships and assistantships.
- Up to 100% waiver of tuition fee in certain cases.

Faculty

- Faculty with Ph.D. degree & Post-Doctoral research exposure from various IITs & other institutions of national & international repute.

Academics

- A flexible, largely modular and modern curriculum.
- Fast-track credit completion option.
- Provision for full semester internships.
- Specialization in **Artificial Intelligence and Data Science**.
- Minor in **Robotics and Automation & Artificial Intelligence and Data Science**.

Specialized Centres

- Specialized research centres in the area of AI, Machine Learning, IoT, Cyber Security, 5G etc.
- Centre for Technology Business Incubation and Entrepreneurial Leadership.

Academic and Research collaborations

- With various universities and industries in India and Abroad (USA, Canada, UK, Switzerland, Sweden, Spain, France, Italy, Russia, Taiwan, etc.)

• MERIT BASED ADMISSION • NO CAPITATION FEE • NO MANAGEMENT QUOTA

Recent Awards & Accolades

- Felicitated for its valuable contribution in promoting **Liberal Arts Education**, at Times Education Icons 2019-20.
- **Awarded Distinguished University of the Year 2019**, at IDA Education Awards by India Didactics Association.
- Recognised as the **Great Place to Study at the House of Commons**, London, UK, in 2019.
- **Ranked 8th in Private State University** (All India) and **Ranked 2nd in Private State University** (In Haryana) in Outlook-ICARE India University Rankings 2019.

Our Edge

50+ Years of Excellence in Education

Over 40,000 Students and 2,500 Teachers

More than 85+ Programmes to choose from

65,000 Strong Alumni Network

24 Educational Institutions across the Country

Quality Education from Pre-Nursery to Doctoral Level

Programmes Offered

- Engineering & Technology
- Management Sciences
- Journalism & Mass Communication
- Pharmaceutical Sciences
- Design & Visual Arts
- Education
- Biosciences
- Legal Studies

Collaborations with Oracle (B.Tech) and KPMG (B.Com) for industry-oriented programmes

Key Highlights

- Several merit cum means scholarships available
- Separate hostels for boys and girls, with all modern facilities
- Transport facility available from key pick up points in Delhi NCR
- Excellent faculty including academicians with international experience

International Collaborations

Excellent Placements*

* We offer only placement assistance. Placements may vary with industry requirements, market sentiment and student merit.

MILESTONES

- Recipient of Academic Excellence Trophy for "Best Engineering College in UPTU" for Two Successive Years from H.E., The Governor of U.P.
- The only Institution in U.P. to have approval from DST, Govt. of India, for establishment of Centre of Relevance and Excellence in Industrial Automation & Robotics
- Skill Development Centre established in partnership with National Skill Development Corporation (NSDC)
- "Best LabVIEW Academy in India" Award by National Instruments
- Award for Excellence & Innovation in Robotic Education by All India Council for Robotic & Automation (AICRA)
- "Best Industry Institution Association" Award by Royal Academy of Engineering, UK

INNOVATIVE PROJECTS BY STUDENTS

- First Prize in World Robot Olympiad, India Competition at Ahmedabad
- Student Project "Win Switch" awarded amongst best three projects by "US-India Startup Forum" alongwith other two project from alumni of IIT Kanpur & IIM Ahmedabad
- Winner of Inspiration Award in Smart India Hackathon organized by Ministry of HRD & AICTE
- "Smart Agricultural Support System" won 2nd prize in National Design Contest NI YANTRA
- Five students awarded as "University Innovation Fellows" by Hasso Plattner Design School, Stanford University, USA

UNMATCHED AND UNBEATABLE RECORDS BY STUDENTS DURING 2019

- 16 students in the Branch wise Merit Lists of AKTU with highest tally of 2 Gold & 2 Silver Medals
- Deeksha Singh received the CHANCELLOR'S MEDAL for Best B.Tech student across all branches
- 97% B.Tech and 96% MCA students graduated with 1st Division/Distinction
- Excellent performance in GATE with Suyash Omar securing 72th All India Rank
- 5 Students with CAT score above 95 with Aniket Agarwal securing 99.18 percentile
- 4 students in IITs, 2 in IIMs, 1 in IISc Bangalore, 1 in MDI Gurgaon and many others selected for M.Tech and MBA in eminent institutions
- More than 900 placements in good companies like Infosys, HCL, Torrent Power, MAQ Software, Tech Mahindra, TCS, Robert Bosch, Hero Motocorp, Ashok Leyland, Lohia Group, HSBC Software, Amazon, Wipro, Capgemini, Cognizant, IBM, NIIT and many more
- 233 students of AKGEC amongst 1900 CLAD certified and 18 students amongst 241 CLD certified professionals in the whole country

INTERVIEW

Prof John Varghese, principal
St. Stephen's College, Delhi, **No 1 IN ARTS AND SCIENCE**

Perfection is always achieved only tomorrow

BY REKHA DIXIT

Q/What makes St. Stephen's stay right up on the top? Apart from its history and illustrious alumni, what makes the college so sought after?

A/I am going to share some secrets. The first one is hard work, which is perhaps the singular most important feature which distinguishes us. The students we select are among the best in the country, they have worked hard to reach here. We have stiff competition in college, but it is not a selfish competition, it is a healthy one.

The second secret is a willingness to share. We encourage everyone to share what they have—lecture notes, meals, talents and abilities. We have several platforms for our children to share their abilities, we also tell them to excel in whatever they are doing, whether holding a blood donation drive or a musical performance.

Anyone at the top knows that you cannot stay there forever, unless you work at it day after day. I am sure the other colleges also put in their best. But we are not competing with others, the competition is from within. Brazilian racing legend Ayrton Senna once said that the limitations were his own. It is not a limit someone else puts on me, he said. Here, we are also constantly aware that our limitations are within us and we constantly push

those limits.

Q/This has been an eventful year for education. Let us start with the National Education Policy 2020. Your opinion, please.

A/The NEP 2020 is a culmination of years of aspiration. Having been in the teaching field for over two decades, I know the many occasions when we felt a serious lapse in the policy. This document is an aspirational one, it tries to look at many of the deficiencies we have experienced. As a document, it promises to be a cure. As teachers, however, we know that our aspirations are not exactly what happens. While a good document, its success lies in how well the good intentions are carried out.

One of the many nice things in India is its cultural plurality. It must be retained. The needs of those on the fringes of education should be addressed. Then, NEP 2020 will be a real success. Implementation, and taking [along] all sections of our country, is the key.

Q/There are already protests about the three-language formula.

A/I was born in Tamil Nadu and when I was in school, there were protests against Hindi. So, I passed out of school without learning Hindi. Today, I am in Delhi and by default,

have to use Hindi in several instances. I really regret that I have not had a formal education in Hindi. I know the limitations and feel that as a child, had I learnt Hindi, I would probably have done better. Having said that, I am against the kind of imposition which seems to be there. A three-language formula is not a bad one. Children are very capable of absorbing many new things. The option should be given to the child to determine what these three languages are going to be. If there is a freedom of choice, and if the government makes it possible for it to be comfortable for every child to learn in the language they choose, we will be at a level where no one else in the world can catch up with us.

Q/How has the pandemic impacted education?

A/It has affected us in many ways. This campus is extremely beautiful, but our children are missing. What is the purpose of a campus without children? It is an important part of their growth to interact with each other, have activities where physical contact is important. The pandemic is terrible, it has distanced us.

It, however, has also come as an opportunity for teachers to look at another set of methodologies—on-

line. A teacher cannot afford to be stagnant, and the pandemic has forced them to learn things they probably never learnt before.

The pandemic came with challenges and blessings. When the lockdown was proclaimed, I put up a letter on the college website telling everyone that this was a time for us to look within ourselves, to see what is truly important to us and what we can do away with. The pandemic provided us with a wonderful opportunity to introspect.

Q/Which is that one lesson which will stay long after the pandemic is over?

A/The pandemic has made each of us understand that we are so small, a microcosm, in this huge universe, and there is something even

smaller than us, which can rewrite our life. This Covid-19 virus is such a small thing, but it has got the whole world on its knees. One of the greatest lessons a teacher can bring to the classroom is a sense of humility. That there is no reason for us to gloat and strut around feeling powerful. We are not. We are always in the process of becoming better. Perfection is always achieved only tomorrow.

Q/St. Stephen's was planning to apply for a deemed university status.

A/We would have loved to have become a university but I don't think we are ready for that, yet. We are, however, ready for autonomy, and we hope NEP 2020 will be able to grant autonomy to the most deserv-

ing institution in the country.

Q/How do you see the youth having changed over the decades.

A/They are smarter, more technically savvy and, what hits me in the face is that they are so focused. At their age, I don't think I had this much clarity on what I wanted to do with my life. The world has evolved and has offered them more opportunities. I think with all the cumulative experiences passed on to them through families, friends and teachers, they have become a better set of young people. While there is so much to be worried about in the world—political disturbances, natural calamities, environmental hazards—I am confident that this set of young men and women will pave the way for a brighter world. **■**

Vikaas Group of Institutions

A visionary, philanthropist, social activist and former MLA who had served as Minister under two Chief Ministers Krishna J. Palemar founded Vikaas Education Trust in 1993, beginning with a College of Physiotherapy. His desire to reach out to more number of deserving candidates at

Pre-University level motivated him to establish Vikaas PU College in June 2012 and The Degree college in 2019.

Bagged 5 Ranks in State PU Board

Apoorva M.
4th Rank (594)

Priyanka H.
7th Rank (591)

K Raksha Bhaktha
7th Rank (591)

Chethan N
8th Rank (590)

Ashritha M
10th Rank (587)

In the academic year 2019-20, 138 students have secured distinctions, 159 students have passed in first class and 89 students have brought glory to the college by securing 100 out of 100 marks in various subjects. The quality of education offered at Vikaas PU College is evidenced by the fact that 99.02% of students have passed in the Science and Commerce sections.

Priority for Safety

First among educational institutions in the state to deploy Bio-Sanitising Tunnel. Vikaas also boasts of taking another lofty decision of getting every student insured up to Rs. 1 lakh.

In-Campus Hostel facility for boys & girls with hygienic food prepared from organically grown vegetables.

Courses offered

Pre-University College

Science : PCMB, PCMC, PCMS
Commerce : BASE, BASBm, BASC

First Grade College

BCom (Along with CA, ACCA / CMA and Aviation Management)

College of Physiotherapy

BPT (4½ years) | MPT (2 years)

Coaching available for : CET, JEE, NEET, KVPY, NATA, CLAT, ACCA, CA Foundation & CS

Airport Road, Maryhill, Mangaluru - 575 008

TAMIL NADU AGRICULTURAL UNIVERSITY

Coimbatore – 641 003, Tamil Nadu.

UNDERGRADUATE ADMISSIONS 2020-2021

Tamil Nadu Agricultural University (TNAU) is a century old premier institution providing Agriculture education in India. The National Institutional Ranking Framework (NIRF)-2019 of Ministry of Human Resource Development (MHRD), GOI ranked TNAU as the second among the State Agricultural Universities in India. Moreover, TNAU figured 68th and 44th place in 'Overall' and 'Universities' categories, respectively in NIRF ranking 2019 and Ranked 105th in QS-BRICS during 2019. The ICAR has accredited Tamil Nadu Agricultural University, Coimbatore for a period of five years i.e. up to 31st March 2023.

TNAU invites ONLINE APPLICATIONS for admission to the following undergraduate courses for the academic year 2020-2021 offered through 14 Constituent and 28 Affiliated (Private) Colleges.

1) B. Sc. (Hons.) Agriculture	6) B. Tech. (Agricultural Engineering)
2) B. Sc. (Hons.) Horticulture	7) B. Tech. (Biotechnology)
3) B. Sc. (Hons.) Forestry	8) B. Tech. (Energy and Environmental Engineering)
4) B. Sc. (Hons.) Food, Nutrition and Dietetics	9) B. Tech. (Food Technology)
5) B. Sc. (Hons.) Sericulture	10) B. Sc. (Hons.) Agribusiness Management

REQUIREMENTS: Candidates, i) Must have passed all the eligible subjects in HSC/CBSE/ICSE/equivalent, ii) Should not have completed the age of 21 years as on 1.7.2020 except Scheduled Castes (SC) / Scheduled Castes Arunthathiyar (SCA) / Scheduled Tribes (ST), iii) Must possess Tamil Nadu nativity / who have not studied X, XI and XII standards in Tamil Nadu should produce the Certificate of Permanent residence in Tamil Nadu in the prescribed proforma issued by the competent authority. Detailed requirements are available online in the information brochure 2020-2021.

PROCEDURE: Candidates have to submit the application **THROUGH ONLINE ONLY**. No printed application will be issued. Candidate can choose the degree and college based on their rank through **ON-LINE COUNSELING**.

IMPORTANT DATES

Sl.No.	Particulars	Date
1.	Opening of Online Application	07.08.2020
2.	Last date for Online Application	17.09.2020
3.	Editing/Correction of Online Application (3 days only)	18.09.2020 to 20.09.2020
4.	Publication of Rank List	29.09.2020

APPLICATION FEE : Rs.600/- for other categories (Rs.300/- for SC,SCA & ST candidates) should be paid online using the link provided in the online application.

APPLICATION WEBSITE: <https://tnau.ac.in/ugadmission/>

Limited online application filling facility will be provided at all constituent / affiliated colleges / Research Stations and KVKs of TNAU.

MSME - Business Incubation Center

Holy Mary Institute of Technology & Science recognized as **Business Incubator (BI) / Host Institute (HI)** for the Implementation of innovative ideas by the incubates with the support of Entrepreneur and managerial development of MSME through incubator. MSME business incubator is a platform for our staff and students work together for exchanging the ideas grow into novels, to stimulate and form new prospective ideas that are truly shaping the nation. We are proud of our success but we still have a long way to go towards innovation with Business incubator for what the society needs in this diverse intermingling of technologies, languages, Voices, ideas, business models and prospective.

"HITS proudly says that not only producing the employees but it produces employers as well as entrepreneurs with MSME BI"

Intelligence and Data Engineering Analytics

This program is a top-up program delivered in a blended mode including self-paced online instruction as well as onsite, facilitator-led face-to-face sessions. Columbia University has created / designed a program on IDEA. Both Columbia University and Pearson wanted to check the course standards suitable to Indian education as the course is of very high standard. Holy Mary Institute of Technology & Science is the only college as of now in whole of India to run this program.

2nd Guinness World Record

Reinvent Higher Education at MIT Art Design Technology University & holistic approach through the new dimensions of online learning during this COVID Pandemic:

The COVID Pandemic has made entire university to rethink the way we impart education to our students. To ensure that our students begin the academic year without further delay. Notably, the Entire semester for undergraduate and post-graduate courses is scheduled to begin in July as per the regular University calendar schedule every year.

MIT Art Design Technology University was established in the Year 2016 as per the UGC act as per the private state University Act, of State Govt. of Maharashtra. **Hon'ble Dr. Mangesh Karad, Secretary MAEER's MIT Group of Institution, man behind conceptualizing this University** to offer education in the most unconventional fields and in the most unorthodox formats.

MIT Art Design Technology University is an Initiative of MAEER's MIT Group of Institutions who are pioneer in privatization of engineering education in Maharashtra. **Dr. Vishwanath Karad, Father - Founder & Director General of the MAEER's MIT Group of Institutions** is one who has made this possible in Maharashtra and launched the first Private Engineering college **Maharashtra**

Institute of technology in the year 1983. Today the Group represent more than 4 Universities and 15+ schools with the name **Vishwashanti Gurukul, CBSE and IB pattern schools**, spread across India. The university campus is spread over sprawling 120 acres, previously owned by **Late Legendary Bollywood Actor Raj Kapoor**.

The MIT-ADT University was recently awarded the 'Best University Campus 2017' by the **Associated Chambers of Commerce India (ASSOCHAM)**. In the 2018 the said University is been awarded as a **Best Private State University 2018** by **Better India Education award**. This spectacular campus offers state-of-the-art infrastructure, extensive library, hostels, playgrounds, tennis courts, basketball courts, swimming pool, cricket and football grounds, indoor sports facilities and a theatre.

MIT ADT offers multiple courses at Under Graduate, Post graduate and Doctorate levels in Fine Art Design, Management, Marine engineering, Bioscience Engineering, Food Technology, Film and Television, Broadcasting and Journalism, Vedic Science & Education and Literature studies.

Preparing for future after this pandemic situation of COVID-19 entire world is suffering MIT ADT University is ready to evaluate as well as to support private state University Education System:

After this Pandemic situation Entire University education is live via video

lecturing using the University learning management system along with the live streaming facility as well as the through the virtual lab establishment to all the core engineering as well as design Nish programs. All the assignments and Practical's are demonstrated using virtual lab establishment online tutorial mode helps the students to evaluate regularly along with the delivery of the subject. MIT ADT University is pioneer in the privatization of University education it also established the proctored evaluation system for the entire university students and declared it's almost all the results on time. Also Initiative of PERA Foundation by the Association of the Private state university leads the university admission process on time to all the private state universities in Maharashtra as well as in India. Lot of Private state university admission process will be streamlined through this to start their academic on time.

Associate Concern
Era's Lucknow Medical College and Hospital, Lucknow, India

ACCREDITED BY

INNOVATIVE
TEACHING METHODS

EXTENSIVE USMLE
PREPARATION

INTERNATIONALLY
EXPERIENCED FACULTY

ON-CAMPUS
MEDICAL CLINIC

PROGRAMS OFFERED

- 4 Year MD Program for College Graduates
- 5 ½ Year MD Program for 10+2 / Form 6 (Upper) / A Level

RECOGNITIONS AND ACCREDITATIONS

- Accredited by Barbados Accreditation Council (BAC)
- Accredited by CAAM-HP
- Licensed and Recognized by Ministry of Education, Barbados
- Listed with FAIMER & World Federation for Medical Education
- Recognized by Medical Council of Canada (based on WDMS Listing)
- Recognized by Medical Council of India

AUB ADVANTAGE

- USA based curriculum with extensive USMLE preparation throughout the program
- Clinical Rotations in USA & Caribbean countries
- Our graduates have successfully matched into residency programs in the US
- On-campus medical clinic provides early clinical exposure
- Use of 3D Medical Animation, Educational Video Games & Softwares
- Research facilities available for all students
- Housing, Cafeteria and Sports facilities are available on campus
- Affordable tuition fees with Scholarships and Financial Plans
- Admissions 3 times a year (January, May and September)

APPLY NOW

LLOYD LAW COLLEGE

(Approved by Bar Council of India)

“Embarking on some of the most defining years of your life, earn a career not just a degree?”

WHY LLOYD

- Well conceptualized curriculum to impart legal knowledge and cultivate professional skill sets.
- Collaboration with NLSIU-B, RGNUL-P, ICSI, PENN LAW-U.S.A., The University of Buckingham-U.K., LJM-U.K., SILF, MILAT, ELCOP, SAARCLAW, CLEA & Pranab Mukherji Foundation for academic excellence.
- Internships with most prestigious Legal and Corporate firms.
- Lucrative placement opportunities through Annual Job Fest.

The silver lining

The fallout of the pandemic powered the much-needed systemic change in education. The time is ripe for innovation

BY PRATIBHA JOLLY

EDUCATION HAS FOR long been considered the hardest sector to reboot. Covid-19 changed that in one fell stroke. It pushed students and teachers into the future of education. A future that had long been talked of but largely disregarded.

But, though the pandemic forced educational institutions to rush to digital platforms and enter the virtual classroom, there was minimal familiarity in its use. The result was the transfer of the ongoing teaching routine to the virtual space. What followed was a string of montages, snap shots of written notes, doodles and derivations, PowerPoint presentations, old and new, and collation of information from web resources. However, even as interactive learning and personal connect was fragmented, frugal innovation and effective transition to the virtual mode was commendable. More importantly, perhaps, the strongest critics of online education discovered its power, picked up digital skills and developed new competencies.

The pandemic highlighted the value of open distance learning and open educational resources. Large populations of students, faculty, and public at large have benefitted from the state-of-the-art course materials made freely available by diverse entities. The virtual academic landscape is now abuzz with a broad range of webinars with global outreach, master classes, engaging extramu-

“
Time is opportune to re-evaluate the extant structure of the degree programme with its content-laden curriculum, rigid teaching schedules, and graduate outcomes determined by an end of the year examination.

ral events, and social and cultural festivals.

The fast-evolving virtual digital forums have enlivened professional conferences replete with exceptional speakers, plenaries and breakout sessions; immersive workshops; poster and exhibition stalls and interactive lounge experiences for the personal digital avatar. This has helped academia envision the innovative power of immersive technologies. It has also brought into mainstream general education the discourse about technology-enhanced learning and the need for creating, adopting and adapting high quality instructional material for online delivery.

Building effective educational institutions is a complex task. Reinventing well established institutions and dislodging old practices is all the more difficult. The experience of the past few months has lowered attitudinal barriers and provided the necessary impetus to usher in the much-needed systemic change. As institutions brace for the new academic session, they will have to strengthen resilience and the capacity to embrace disruption and ask fundamentally challenging questions.

Academic leaders will have to redefine the periphery of their outreach. Perforce, they will have to invest in digital infrastructure for enabling learning anytime, anywhere on the campus and beyond. They will

have to learn to straddle the physical and virtual spaces with equal ease to create the hybrid campus. Furthermore, faculty will have to strategise a novel quality framework for teaching-learning.

Time is opportune to re-evaluate the extant structure of the degree programme with its content-laden curriculum, rigid teaching schedules, and graduate outcomes determined by an end of the year examination. It is time to review all processes, experiment, innovate, redesign and recreate appropriate alternatives. Students need to be informed of the changes and helped to reset personal goals and expectations. They need strong mentoring and hand-holding as they negotiate new terrains of learning.

It is yet uncertain if and when students will be able to return to the campus. However, it is easy to predict that there is no going back to the old ways. As educational institutions reboot to a new reality, they will have to envisage much more than safe usage of physical spaces, heightened personal hygiene, testing for the infective, enhanced health care, secure residential accommodation, and a robust scaffolding for mental health and wellness.

For some time now, over admission has been rampant, and colleges have been struggling to manage the expansion-equity-excellence triad creditably. Merely breaking the class into smaller sections will not suffice. With the overarching paradigm of active self-paced learning, novel hybrid models of teaching will have to be created and fine-tuned to address specific course dependent needs. A plausible approach is to have online lectures for large groups augmented by frequent face-to-face interactive engagement—the so-called tutorials for smaller groups. The latter can also quickly go online in case of a sudden campus shut-down. Science disciplines will have the additional challenge of innova-

For some time now, over admission has been rampant, and colleges have been struggling to manage the expansion-equity-excellence triad creditably.

tively integrating hands-on activities and laboratory work.

Institutions will have to garner expertise in educational technology and instructional design. Development of online content will entail sustained capacity building of faculty to engender a nuanced understanding of how meaningful teaching-learning requires not just domain knowledge but also knowledge about pedagogy and technological skills. In-house resources will be best co-developed in collaborative faculty teams with complementary skills. Institutions will gain by proactively contributing to national consortiums building repositories of massive open online courses and virtual labs. To stay relevant, this experience is crucial for the faculty.

The next wave of disruption will come from data analytics, adaptive and immersive learning technologies that will bring personalised education to students' devices. Students now are digital natives. Socially networked, they have manifestly new ways of garnering knowledge, learning and sharing. For them, the current crisis has been disruptive,

but not necessarily detrimental. Peer networks have been highly resilient. They have engineered novel ways of disseminating learning resources, overcoming digital access through mobile communication apps. Increasingly, students are deciding their own learning trajectory, exploring best available resources and supplementing the degree programme with a portfolio enriched by online courses, skill-based micro credentials and nano-degrees. Facilitating experiential learning are service providers offering early internships and placements. This trend will increase exponentially. Mechanisms have to be created for formally recognising these student achievements.

Institutions will be known for agile crisis management; how seamless, comprehensive and cogent their curricular delivery is; the quality of student experience and how astutely they position students for the workplace. Liberal education has many elements that are not vicarious. It integrates experimentation, work in the labs, field trips and early research that interface with the real world.

Holistic education is about face to face interactions, peer learning, collaborations, teamwork, networking with outside agencies and community service. It is about nurturing talent and building soft skills. In campuses, the noisy corridors, brimming cafeterias, lively discussions, debates and discourse, the sports competitions and the vibrant cultural landscape provide opportunities for personal growth and developing an identity, for humanism and citizenship. The real challenge will be to create an immersive hybrid campus life which epitomises such open-ended learning that continues to be hands on, minds on and hearts on.

Jolly is former principal, Miranda House, University of Delhi, and academic consultant, National Assessment and Accreditation Council.

Assess students, do not test them

BY PROF M. RIZWAN KHAN

OVER THE LAST couple of years, the ministry of human resource development, the University Grants Commission and various other regulatory agencies have been attempting to ensure quality in education with the help of accreditation and ranking agencies. But these efforts always met with systemic resistance.

Today, because of Covid-19, online pedagogy, among other mantras of quality in higher education, has come to the fore. Many options like massive open online courses, credit transfer and e-governance have remained underutilised by institutions. But the pandemic has left us with no option. There are visible changes in the attitudes of teachers, students and other stakeholders to create a mental and physical viability for online pedagogy.

However, stakeholders at all levels of education have faced challenges during the preliminary phase of online teaching. Now that we have realised that online teaching is going to stay on as the future mode of education, government agencies and institutions need to develop policies, provisions and practices for it.

When innovations occur, quality check has to follow as a response system to fructify the results of innovative pedagogy. Institutions and stakeholders need to regularly assess what an innovation facilitates. The answer to this question will lead to quality assurance. Regular stock-taking through a transparent feedback system is a handy tool to conduct such validity checks.

Generally, academic administrators focus on teachers, while the

attitudes and behaviours of students are ignored while considering innovative practices in pedagogy. Teaching is popularly considered to be synonymous with lecturing, while learning is thought to be synonymous with listening. But in the online mode, teaching and learning has to be a collaborative exercise, wherein teachers have to go beyond lecturing and students have to participate actively in the teaching-learning process by following the exercises, activities and instructional materials uploaded online.

The pandemic provides teachers and institutions with a window to change the hackneyed systems that have stopped being fruitful. Virtual pedagogy will ensure that lack of infrastructure and space will become less of an excuse for non-performers. But internet access remains a major road-block for many students and teachers. Virtual space needs to be developed in place of physical space to facilitate effective learning.

The government and institutions need to divert their funds to ensure internet access to teachers and students. These funds can be easily

created because running costs of campuses have reduced significantly because of negligible physical presence of teachers and students in campuses. This will lead to equity and will ensure that the 'Covid-19 batch' does not suffer for no fault of its own. Additionally, internet and learning management system service providers need to collaborate at the government and institution level.

A significant paradigm is the examination system. At present, most institutions are perplexed with regard to conducting examinations. The pandemic has given us an opportunity to revisit the entire idea of examination, testing and evaluation. We need to decide whether we want to test or assess our students. Testing and evaluation need to be subordinated with the spirit to assess a student rather than to pass a judgment on a student. Assessment is more constructive and positive. We must not forget that the examination system has a washback effect on pedagogy. When our students are tested they study to pass the test, but when our students are assessed they study to perform. Therefore, we must switch over to assessments that are formative. The pandemic is likely to have a lasting impact on our lives and minds. Therefore, we need to minimise the burden of this impact by creating an ecology where judgmental and penalising tendencies are weeded out.

Khan is chairperson, department of English, and director, Internal Quality Assurance Cell, Aligarh Muslim University.

—As told to Abhinav Singh

Challenges and countermeasures

Students initially faced issues in adapting to online learning. However, they have adapted rapidly. We have also encouraged students to undertake specialisation courses in advanced topics like Artificial Intelligence, IoT and machine learning to optimally utilise their time during Covid-19.

Surabhi Karsoliya Sharma, managing director, Technocrats Group of Institutions, Bhopal

There is definitely a big change for the current students to be studying at home, away from the classroom. However, our students are adjusting well to online lectures and our teachers are making sure that these sessions are interactive. The fresh batches are going to experience a new way of teaching.

Sardar Taranjit Singh, managing director, JIS group

In these unprecedented times, the emotional, physical, social and intellectual well-being of the students are taking a hit. The teachers have been very receptive and are adapting to it with utmost vigour and passion. The emphasis is not only on academic excellence but also on ensuring that the teacher-student bond strengthens.

Prof Anuradha Jain, principal, Vivekananda Institute of Professional Studies, Delhi

The current challenges faced by students and faculty include lack of real time interactive discussions, especially in disciplines which require hands-on experience such as architecture, engineering and performing arts. Apart from dynamic and interactive online learning, we are using online simulation exercises to fill this gap.

Sushma Paul Berlia, chairperson, Apeejay Education Society, and co-founder and chancellor, Apeejay Styta University

In an online setting, the social model is disrupted and a new order sets in. This new order focuses on the instructor being more engaging online. Colleges have to focus and get them up to speed. Institutions have to do that on a war footing. An institute's attitude to change and embrace the new order may indeed decide its future.

Dinesh Kumar, director, office of international relations, Dr. MGR Educational and Research University, Chennai

Initially there was anxiety and the students were also facing problems related to poor internet connectivity, absence of a favourable environment to study at home and financial problems in the family. But slowly, with the support of colleges, relaxation in fee submissions and mentorship by faculty they have overcome the fear.

Prof Vadana Arora Sethi, group director, Lloyd Group of Institutions

For the fresh batch of students, online classes will be a new type of learning. The students from poor backgrounds will have to fight hard economically against this pandemic. A few students from poor economic backgrounds were forced to work part time. Such students are mentored through class advisers with special care.

V. Balusamy, principal, Kongu Engineering College, Erode

Our students initially faced challenges of studying online via e-books, taking exams online, online classes, online internships and working online jobs from home. But the online culture has caught up and students are getting habituated to it. The faculty were excited to upgrade themselves.

Satyajit Chakrabarti, director, Institute of Engineering & Management and University of Engineering & Management

Owing to the financial crisis, students have not been able to pay the fees. Banks are also not sanctioning loans. Some are not able to attend the online classes because of lack of facilities. For the fresh batch, we are conducting an online foundation course to bridge the gap between school education and engineering education.

S.R.R. Senthilkumar, principal, Sona College of Technology

Students miss the amenities and friends at campus. They miss their usual university campus buzz and life. We had a virtual farewell programme, where a virtual band played for them. We also had a virtual Independence Day celebration. Apart from this, students are being mentored in a very strong manner.

P. Shyama Raju, chancellor, REVA University

Unsure of what to expect

BY SEHAJ THAKKAR

I RECENTLY FINISHED my CBSE Class 12 from Army Public School, Delhi, with 95 per cent marks. By virtue of my Army background, I did my schooling across India, in places such as Bengaluru, Lucknow, Nashik and Wellington (Tamil Nadu). I had chosen humanities in high school; subjects were political science, English, psychology and home science. Psychology, in particular, intrigued me because it explored cause and effect, whereas the other subjects mostly dealt with facts. I wish to change society's attitude towards women's psychological health.

I aspire to join Lady Shri Ram College for Women, Delhi, because it is one of the finest institutions (for social sciences and humanities) in India and I believe it will provide me with the best platform for my holistic development. I was greatly inspired by Gurmehar Kaur, an LSR alumna, who once came to my school for a function. I feel LSR is equipped to provide

everything that I am looking for—outlook, perspective and strong female relationships that last a lifetime. It has girls from all sections of society and meeting them would help me broaden my horizons.

I have been looking forward to my first day in college ever since I started

Class 11. If my dream of joining LSR came true, I was planning to join a club; I prefer the dance society as I am fond of dancing. But, the pandemic has created a lot of uncertainty. Many of my batch-mates were banking on sports trials to get into their dream institutions, but there are no such trials this year. I do not even know what to expect from my first year in college. The Delhi University's application process has been hectic (the admission process will commence in September).

The start of term is probably going to be online, which is disappointing, and the year may get extended, which is annoying. However, I will still have more than two years. And a fresher's party can always take place later! While the delay is making me restless, it also gives me more than enough time to prepare for the next step.

—As told to Abhinav Singh

RESEARCH METHODOLOGY

SINCE 2009, THE WEEK has been conducting the Best Colleges Survey in association with Hansa Research to rank the top colleges in India. This year, the study covered 23 cities; 1,422 academic experts, 2,429 current students, 645 aspiring students and 30 recruiters took part in the primary survey.

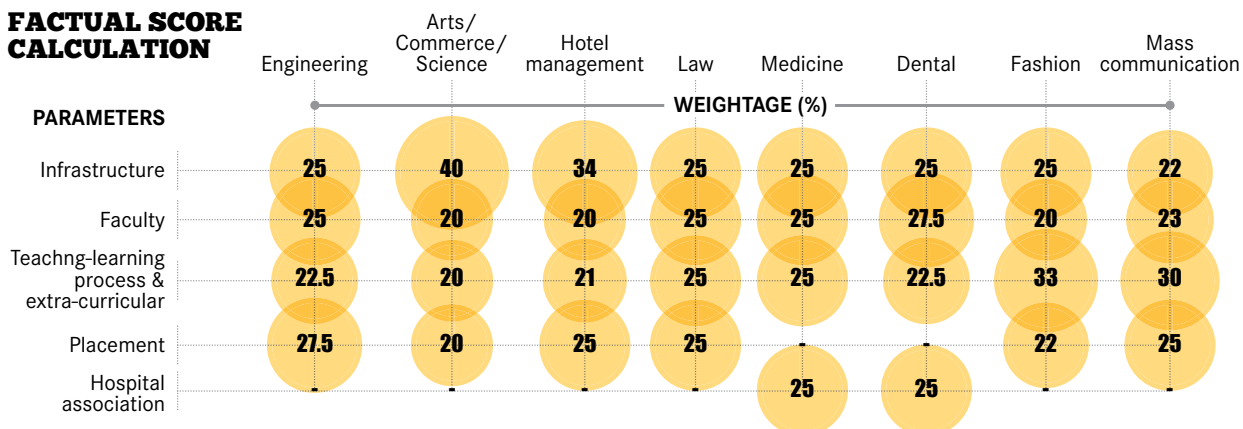

Recruiters' opinions were taken

only for engineering colleges. Aspiring students were interviewed for arts, commerce, science, engineering and medicine. The respondents were asked to nominate and rank the 25 top colleges in India and their respective zones.

Perceptual score was calculated based on the number of nominations and the actual ranks received.

For factual data collection, a dedicated website was created and the link was sent to more than 3,500 colleges. Of the 404 colleges which responded, 22 were rejected as they did not meet the eligibility criteria—at least three batches should have graduated from the programme and 50 per cent of seats filled in the last academic year.

FACTUAL SCORE CALCULATION

Ahead of the pack

Karnataka is set to become the first state to implement the National Education Policy 2020

BY ABHINAV SINGH

The Karnataka government has already been a very forward looking state as far as higher education is concerned. It has scores of technical and higher educational institutions that aim to capitalise the opportunities that the state provides in the field of technology (IT and BT) and other areas such as manufacturing, aviation and many different fields of Research and Development (R&D). With a vast pool of resources, the state capital, Bengaluru, has already established itself as the Silicon Valley of India. Now the state government has also taken several initiatives to develop tier II and tier III cities into technology hubs. Most interestingly, Karnataka is set to become the first state in the country to implement the NEP (National Education Policy) of the Central government. Under the leadership of

Deputy Chief Minister and Minister for Higher Education, Dr C.N. Ashwath Narayan, the state hopes to achieve big in the field of higher education.

The state government had already passed a resolution to accept the NEP and is looking to implementing it soon. It had also constituted a task force in this regard when the draft policy of the Central government came up a few months back. This task force is expected to present a plan of action in this regard very soon. As per reports, the aim is to implement the NEP in phases in the state. Dr Narayan has had several deliberations to chalk out a strategy for the phase-wise implementation of the NEP in the state.

The state government is also planning to set up a research centre for immunology and vaccine development.

Dr Narayan is also optimistic about tier II and tier III cities and has expressed confidence that many IT and BPO companies will set up centres in these cities and the state government will provide them with the full support.

Dr Narayan has also stressed on the need for digital education by higher educational institutes in the state. In a recent seminar he had stated that digital learning can help students in rural areas to get education from a qualified and skilled teacher which is not possible otherwise. Though there are challenges in terms of connectivity and the availability of gadgets, mobiles and other devices. The state government is aiming to provide 4G connectivity across the state so that it aids in digital education.

Despite the Covid-19 pandemic the state government conducted the KCET2020 exam smoothly across the state. The results are expected soon. The Department of College Education has recently started the on-line admission process for admission to undergraduate courses for the academic in government colleges. Students from the state who are seeking admission will have the facility to apply online for admissions. The forms are available free of cost.

JNN COLLEGE OF ENGINEERING, SHIVAMOGGA

Dr.H.R.Mahadevaswamy
Principal
JNNCE, Shivamogga

Jawaharlal Nehru National College of Engineering (JNNCE) was established in the year 1980 by National Education Society, Shivamogga (founded by freedom fighters and philanthropists) to impart quality and affordable education in Technology and Management. The college is endowed with a 48-acre lush-green campus, qualified, experienced and dedicated faculty, state-of-the-art infrastructure and resources, multitude amenities and opportunities for curricular & extra-curricular pursuits, research, innovation, entrepreneurship and consultancy, rewarding institute-industry collaboration, excellent training & placement record and a supportive alumni network across the globe. Not surprisingly, over the years the college has emerged as one of the most sought-after destinations for technical and management education by students and parents from all over India.

JNNCE has successfully consolidated and improved upon its ranking amongst en-

gineering colleges in Karnataka and India, as confirmed by various surveys.

JNNCE, firmly set on realizing its vision of becoming a pace-setting institute in technical and management education and research, has been successfully producing highly competent engineers, managers and entrepreneurs to meet the needs of industry, business and the society. In this direction, the just concluded 2019-20 academic year has been yet another fruitful year for the institute, despite academic dislocation caused by lockdown due to Covid19 pandemic.

Armed with its unique 'Academic Continuity Plan', the Institute has been able to face the new challenges confidently and effectively and to emerge stronger from the experiences, being able to develop its resilience, agility, flexibility to scale up and in the process, to acquire the requisite insights and capabilities to face the new challenges of Higher Education.

Shri Dharmasthala Manjunatheshwara University

Dharwad

Shri Dharmasthala Manjunatheshwara University, established under the Shri Dharmasthala Manjunatheshwara University Act 2018, is in existence since December 19 2018 as a State Private University of Karnataka State, of unitary nature at Sattur, Dharwad. The University has been sponsored by Shri Dharmasthala Manjunatheshwara Educational Society (SDME), Ujire, Dakshina Kannada District, Karnataka a premier non-profit educational organization, under the sacred aegis of Shree Kshetra Dharmasthala and under the able guidance of its distinguished President, Dr. D. Veerendra Heggade, who is the Chancellor of the University. Dr. (Prof.) Niranjan Kumar, a renowned Plastic Surgeon, is leading the University as Vice-Chancellor and Lt. Col. U.S. Dinesh (Retd.) is the Registrar of the University. Shri Dharmasthala Manjunatheshwara University is ranked 12th amongst newly constituted Universities in the All India University Ranking by IIRF 2020. Shri Dharmasthala Manjunatheshwara University is the only Private University which has incorporated digital examination by e-pads from its inception wherein the students write their examinations on e-pads making it easy for them. It is also well received by the evaluators who carry out digital evaluation with "zero error correction". The results announcement is also very fast compared to the conventional methods.

Shri Dharmasthala Manjunatheshwara University presently has 5 Constituent Institutions, all of which run Health Sciences Courses. The Constituent Colleges are:

- 1 SDM College Medical Sciences & Hospital, offering MBBS and Post Graduate (MS & MD) degrees in 22 Specialties in various Pre-Clinical, Para Clinical and Clinical subjects, as well as Fellowships, B.Sc. Allied Sciences and Certificate Courses.
 - 2 SDM College of Dental Sciences and Hospital, Dharwad, offering BDS and Post Graduate (MDS) Degrees in 9 specialties, Diploma Courses and Fellowship programmes.
 - 3 SDM College of Physiotherapy, Dharwad, offering BPT and MPT Post Graduate Courses in five subjects.
 - 4 SDM Institute of Nursing, Dharwad, offering B.Sc. and M.Sc. Nursing programmes.
 - 5 SDM Research Institute of Biomedical Sciences, Dharwad, a World Class Research Centre for stem cell research and therapy offering M.Sc. (Biomedical Courses) and Certificate Courses.
- The University also offers Ph.D. programmes in various specialties.

Constituent Units of Shri Dharmasthala Manjunatheshwara (SDM) University:

SDM College of Medical Science & Hospital: SDM-CMS&H was established in 2003 under the leadership of great visionary Dr. D. Veerendra Heggade, the President of SDME Society. As the Chancellor of SDM University, his dream was to start a Centre of Excellence for Medical Education and healthcare for the people of North Karnataka region at affordable cost. Under the able guidance of the Chancellor and the Vice-Chancellor, Dr. Niranjan Kumar, the institute provides Vidyadana and Aushadhadana to the needy people.

All excellent facilities of SDMCMS&H are spread over in 70 acres of lush green land with unique architectural Buildings. The Medical College admits 100 students for MBBS Course and 98 students for Post Graduate in various subjects. The Medical College is recognized by Medical Council of India, New Delhi, and it is preparing for NABH and NAAC accreditation.

The College has modern laboratories, spacious classrooms and a state of the art Museum. The skill Lab is equipped with latest mannequins and BLS, ECLS and ACLS courses are conducted regularly. The ambience of library is very conducive for studies and it has 16,500 books, National and International Journals.

Two hospitals have total 1,200 beds comprising general and specialty hospital service with 1500 OPD patients daily. The hospitals are equipped with specialized OTs, different ICUs. It also provides super specialty training to the students and healthcare service to the patients. Conferences, workshops and Seminars are regularly conducted. SDMCMS&H has

stood as an epitome of excellent patient care and a quality Medical Education Centre.

SDM College of Dental Sciences & Hospital (SDMCDS & H): The Dental College was founded in 1986 with a mission to Oral health of the local population. Since its inception as one of the very few stand-alone dental colleges, the SDMCDS & H has moved from strength to strength and it provides both therapeutic service and dental education.

The Dental College is recognized by the Dental Council of India, New Delhi, and it admits 100 BDS and 45 MDS students. The College is situated in 23 acres of land with most modern buildings and has 363 dental chairs for the teaching and training. Residential hostels provides very conducive living environment with hygienic food.

The College was affiliated to Karnatak University, Dharwad till 1996, Rajiv Gandhi University of Health Sciences till 2018 and since December 2018 it is under Shri Dharmasthala Manjunatheshwara University, Dharwad. In 1993 SDM CDS & H was the first dental college to set up the department of Implantology. The Royal College of Physicians and Surgeons, Glasgow, UK recognized in 1995 to conduct MFDS and MOMS exams. In 1998, the dental college was established an exclusive Centre for Craniofacial Surgery. The Centre also runs a successful program in the treatment of Cleft Lip & palate with the support of Smile Train, USA.

The Dental College was accredited with "Five Star" in the year 2002, with Grade A in the year 2009 and 2015 successively. The BDS course of SDM CDS & H is recognized by the Malaysian Government. The college also has the collaboration with the Tufts University, School of Dental Medicine, Boston, USA between 2006-2010. The College also organized the residential program on Master of Clinical Dentistry in Prosthodontics offered by the Faculty of Dentistry, King's College, London, UK.

SDM College of Physiotherapy: The College established in 1996 endeavors to impart high quality physiotherapy education. The research and education knowledge is based on the experienced and highly qualified faculty members.

Physiotherapy services are widely used in healthcare organizations, Community, sports and workplace settings, schools and private practices. As an institution of scholars, researchers, teachers and students, the mission of SDM College of Physiotherapy, in the public service is to advance and transmit knowledge and translate research into service.

The College offers bachelors, masters and Ph.D. degrees. The experienced faculties of the college provide rigorous academic, clinical and research experiences in a state-of-the-art infrastructure. The college trains the students exceptionally well in pursuing a long and rewarding career in physiotherapy.

SDM Institute of Nursing Sciences: The Nursing Institute was established in 2006 with a view to train Nursing Professionals to meet the demand for high quality Nursing care in hospitals and Institutes in India and abroad. Competent, compassionate nursing professionals distinguished by liberal art education, evidence based practices, clinical reasoning, safe patient care and committed to the profession is the institute's motto.

Dr. D. Veerendra Heggade
Hon'ble Chancellor,
Shri Dharmasthala
Manjunatheshwara University

Dr. Niranjana Kumar
Hon'ble Vice - Chancellor,
Shri Dharmasthala
Manjunatheshwara University

The Nursing Institute was established by the SDME Society under the Rajiv Gandhi University of Health Sciences, Bangalore. Since 2019 the Institution is functioning under Shri Dharmasthala Manjunatheshwara University, Dharwad.

The institute offers B.Sc. (Nursing) and M.Sc. (Nursing) in five specialties which is recognized by the Indian Nursing Council, New Delhi and the Diploma Nursing Course run by the institute is recognized by the Karnataka State Nursing Council, Bangalore.

SDM Institute of Nursing Sciences has secured 8th position among the top Nursing Colleges, according to a survey conducted by Higher Education Review Magazine - December 2019. The institute has state-of-the-art facilities set up as per the INC standards. Students have a conducive environment for learning and co-curricular activities. The institute has the support of a world class parent medical college and 1,200 bedded ultra-modern clinical facilities located within the campus.

SDM Research Institute of Biomedical Sciences (RIBS):

SDM RIBS is an independent teaching and research institute started in 2019 with the vision of developing a vibrant research institute contributing significantly to knowledge intensive, innovative solution oriented strategies for societal and medical tribulations. The institution is not only intending to offer academic programs in the line of new National Education Policy in collaboration with industry but also aimed to conduct research in the advanced and emerging areas of modern science. The Institute offers post graduate and hands-on training programs in Biomedical Sciences with an objective of nation building through indoctrination of culture of passion & commitments among students and researchers by igniting their minds for innovation through quality concepts, skill and intellectual property development. In the pursuit of Institute's teaching and research in biomedical sciences, the institute always looks for strategic collaborations with local and international institutions and industry. The institute has established specialized research facilities with experienced faculty / researchers to unravel the mysteries of various unmet medical needs through innovative thinking, creative problem solving and cutting edge technologies.

M.Sc. (Biomedical Science) starting at SDM RIBS from the academic year 2020-21 is a two-year programme.

CMR UNIVERSITY

FOSTERING BRILLIANT MINDS FOR A SUCCESSFUL FUTURE

CMR University, Bangalore, a sought-after private university that was established in 2013, aims at promoting education and facilitating path-breaking research in different disciplines. CMR University has adapted the unique "Education Engagement Model" that encourages cross-disciplinary learning and creativity. CMR University aspires to be one of the best educational institutions in the country that promote quality education.

CMR University was established under the CMR Jnanadhara Trust that was founded in 1990, as a tribute to the Late Chikka Muniyappa Reddy, a visionary and an educationalist, who believed in providing quality education to the masses. From the past few years, CMRU has been successful in securing itself among the top universities in Bangalore.

The university offers various academic programmes in the undergraduate, postgraduate and doctoral levels across disciplines such as Architecture, Commerce, Education, Engineering, Legal Studies, Management, Media & Entertainment, Humanities and more. At the Undergraduate level, the university offers B.Arch, B.Tech/B.Tech (Hons), B.Com/B.Com (Hons), BBA/BBA (Hons), BA/BA (Hons), BCA, B.Sc, LL.B, BA LL.B (Hons), BBA LL.B (Hons) and B.Com LL.B (Hons) programmes. At the Postgraduate level, the university offers M.Tech, MBA, MA, M.Sc (Psychology) and MSW programmes. CMRU also offers various Doctoral programmes. Apart from the usual academic programmes, CMR University also offers PG Diploma programmes and certificate courses (both full-time and part-time).

The core faculty team at CMR University is comprised of an

equal blend of young and experienced lecturers who come with years of experience in academia as well as the industry. Eminent industry leaders also visit the university to deliver guest lectures and share their inputs with students.

All the campuses of CMR University are conveniently situated in prime localities and are technologically advanced. The hi-tech classrooms in every campus come with projectors and other facilities to encourage blended learning. The state-of-the-art laboratories, auditoriums, workshops and libraries contribute to an effective learning environment.

CMR University also has Makerspace, an interdisciplinary, community space where theoretical skills and classroom knowledge is used in real world projects. Makerspace at CMRU is a place for students to explore and learn new skills while collaborating with diverse individuals to test their ideas, solve problems and innovate. CMR University also uses concepts such as Design Thinking, a creative approach to solving complex problems of different natures. Design Thinking is process-oriented and brings together methods and techniques that enable us to think of and explore countless solutions to a specific challenge. Being an iterative process, it encourages prototyping your ideas from an early stage and help you test your concepts and ideas.

The university regularly organizes various seminars, workshops, exhibitions, guest lectures and industrial visits to ensure that students obtain a learning experience beyond the walls of a classroom. CMRU also believes in the importance of encouraging extracurricular activities as it promotes overall development among students and helps them learn life skills such as effective communication, decision-making, problem-solving, analytical skills and more.

CMR University aims to drive positive global change in the field of education and foster creative communities where new ideas can be nurtured, new discoveries can be made and new creations can be shared.

In the light of the pandemic, COVID-19, CMRU uses both online/offline classes and blended learning formats to educate students. The campuses are also well sanitized and measures are taken to ensure that the environment is safe for students and staff alike.

NEW FUTURES. NEW REALITIES.

JOIN US. WE'RE READY.

ADMISSIONS FOR 2020 ARE OPEN. APPLY NOW.

As we collectively learn new ways of navigating this strange and altered world, at CMR, we understand that **safety and security** are now of utmost importance in your learning journey. Feel free to reach out to know more about our Covid-19 preparedness.

ASADI (Asian School of Architecture and Design Innovations)

ASADI (Asian School of Architecture and Design Innovations) is a unit of ABR Foundation, Kochi, initiated by its Managing Trustee, Prof. Ar. B.R. Ajit, who is a leading Architect in the country. Prof. Ajit is also the Chairman & Director of ASADI.

ASADI most importantly looks towards galvanizing the students to grow as a class apart, as architects committed to sustainability, who would be role models for thinking out of the box, dreaming, conceptualizing and accomplishing projects with unparalleled perfection. ASADI's aim is to ensure that its graduates are fully well versed in sustainable design principles (Green Buildings) and possess the ability to undertake rigorous analysis of their building design proposals.

ASADI offers a five year B.Arch program approved by the Council of Architecture (COA) which is the statutory organization in the country for the education and practice of architecture. ASADI is affiliated to Mahatma Gandhi University which is situated in Kottayam, Kerala. ASADI's faculty, most of whom are Post Graduates, come from varied fields of architectural expertise ranging from Urban Design, Urban Planning, Landscaping, Sustainable Environmental Design, Interior Design etc.

The faculty also work in ACD (ASADI Consultancy Division) and are therefore in touch with current trends in the industry which is imparted to the students in the course of their teaching. ASADI has implemented various programs and projects for the students from the first year onwards, that give great stress towards the concept that each aspiring architect needs to be molded in the manner he himself looks forward

to be, thus ensuring that every student who passes out from the institution will be a proponent of his own school of thought. Students of ASADI are involved in site visits, case studies, documentary work, R & D work etc. They also go on study tours to different parts of the country, participate in NASA programs and also attend talks by prominent personalities from all over the world in various fields of work. The students are given hands-on experience with projects during their five years of architectural education at ASADI.

ASADI's vision is to create "Ready Architects" for the society who will be well versed in the practical application of architecture.

ASADI is blessed with an International Board of Governors consisting of professionals and leaders like Prof. Chris Johnson (Australia), Dr. Davina Jackson (Australia), Noted Cine Director, Dr. Adoor Gopalakrishnan (India), Ambassador T.P. Srinivasan (India), Prof. Sara Udina (Barcelona), Dr. Sunil Dubey (Australia),

Dr. Elisa Silva (Latin America) and Dr. George Polson (USA).

ASADI conducts regular workshops every year, encouraging the students toward innovation, and an example of this is the week-long workshop conducted by the ASADI International Board of Governors (IBOG), which gave students a view into the different aspects of architecture practiced around the world.

ASADI's very first batch of students secured the 1st & 6th ranks in the MG University examinations and this was also the very first time that a private institution was able to achieve the top ranks in the University examinations.

ASADI is in discussions with various International Universities for tie-ups for the purpose of exchange programmes for students and faculty members. At the end of the five year course "Start-Ups" will also be provided to the deserving students to help them get started before they set up their own businesses.

Focus on Focused Equity Funds

BY PURUSHOTHAMAN S.S.

THE YEAR 2020 has been a roller coaster ride, especially for investors in the equity markets. The year began with euphoria as Indian benchmark indices scaled

new heights. However, the spread of the Covid-19 pandemic brought an abrupt end to the party. The subsequent weeks witnessed sharp fall in these indices. But the tide turned again quickly, with markets showing a sharp recovery since the lows touched in March.

The situation makes it difficult for an average investor to decide what to do and what not to do. The sharp recovery, led by some selected high-quality stocks across the spectrum make many people sit back and think that the same stocks were available at a steep discount just a couple of months back. The quality of those stocks and the companies was never in question hence an experienced and skilled investor or a fund manager would have doubled down on those stocks in such a period.

That being said, such ups and downs are part of market cycles and hence it is good to be prepared for the next round of opportunity. One way to do that is by investing in Focused Equity Funds. Let us understand how this category can help you.

What is a Focused Fund?

Focused Funds are a category of equity funds as defined by the Securities

and Exchange Board of India. As per the market regulator's categorisation, these funds portfolio can hold up to a maximum of 30 stocks. The portfolios of this type of fund largely tend to have a multi-cap approach.

From an investor point of view, one way of looking at any fund is where it fits in the risk-reward spectrum. Some funds come with high risk while some others come with a relatively lower risk. One way in which risk goes up or down is through diversification. Accordingly, a large-cap equity fund could aim to reduce risk by investing in over 50 stocks. Similarly, a sectoral fund would invest only in a handful names in a targeted sector, thereby increasing concentration risk.

The Focused Equity Funds hit a sweet spot between the two categories explained above. So while the portfolio of such a fund will be a little concentrated, it will not be very concentrated to take the risk to dangerous levels. At the same time, the diversification will not be so wide that the gains become miniscule. In other words, these funds are concentrated yet diversified!

Is it a good time to invest in Focused Equity Funds?

As the sharp recovery of the markets is already indicating, quality businesses and their stocks will continue to perform. However, there could be phases where this type of fund may witness a temporary blip in performance. However, the recovery is also expected to be equally sharp.

That being said, uncertainties still remain as global and local economies continue to reel under the impact of the spread of Covid-19. As a result, in the near term several companies across sectors will be impacted by the

disruption brought about by the virus. In the light of this, it makes absolute sense in placing your faith in high quality businesses. For a lay investor, this can be easily achieved through investing in Focused Equity Fund which aims to invest in good quality businesses across the spectrum and is market capitalisation agnostic.

Picking a winner

There are several offerings from various fund houses in this category. However, if one looks at the consistency in fund performance across market cycle, there is a fund which stands out of the pack and is ICICI Prudential Focused Equity Fund.

The performance of the fund can be easily gauged on how the fund performed over the last six months—a time when markets were at its volatile best. As on August 17, the fund returns stood at 7% vis-à-vis the peer group return at -6%. The numbers are similar for a three-month and one-year periods as well, indicating significant out-performance compared to its peers.

What also makes this fund special is the methodology the fund house uses to pick stocks which are to be a part of the portfolio. All the stocks selected by the fund manager have to be market leaders, or have a strong balance sheet, or are low-cost producer in their area of speciality or are having an attractive valuation vis-à-vis its potential. Such an organised approach ensures that the selection remains largely on the side of the impeccable. Moreover, it is a multi-cap focused fund, thereby, not restricting itself to only large or popular names.

If an investor wishes to partake in the India growth story and gain from the potential of the Indian economy, investing in a Focused Equity Fund like ICICI Prudential Focused Equity Fund can be a good starting point.

EVER THE SEEKER

Filmmaker **Anand Gandhi**'s next project will revolve around the pandemic and delve deeper into questions of human identity and existence

BY PRIYANKA BHADANI

It was 2015. The novel coronavirus was nowhere in sight. Anand Gandhi was thinking about a film on a pandemic. He gave it a tentative name, too: 2020. Little did he anticipate that his idea would one day become reality. That, too, in 2020. The idea has now been recalibrated—Gandhi’s film, *Emergence*, will look at life in a post-pandemic world.

Though he gave up formal education at 15, Gandhi did not give up on his quest for knowledge. He always yearned to learn about the myriad mysteries of life and existence. It is, therefore, no surprise that in his much-celebrated debut, *Ship of Theseus* (2012), a conversation between two characters, Charvaka and Maitreya, is about a fungal spore that hijacks an ant’s body, changes its behaviour and makes it a vehicle for its own proliferation. Charvaka then wonders what trillions of microbes in a human body could be doing to an individual. That was when Gandhi’s quest began.

He took it a step ahead in *Tumbbad* (2018), which he co-wrote. The film set in 1918, when the Spanish flu struck (but not based on the pandemic), “used horror as a means of investing in nightmares, investing in cautionary tales, in methods of thinking about... what kind of horrors and problems human beings can find themselves in.”

Gandhi was certain that all these investigations—about human identity, consciousness, sentience and about what a virus could do to the human mind—could only come together through the story of a pandemic. As disheartened as he may be as an individual to see what Covid-19 has done to the world, as a storyteller

his job may have become easier.

“Now, I don’t need to entertain my audience talking about the pandemic and can jump straight into the second part of it. I can make a sequel to a film that I never made,” he says, laughing. “I can share my epiphany and my speculations. I can share with the world what could possibly come into existence a few years or decades from now, which, for a writer, is a dream situation to be in.”

The task, however, is now to look for a new face. When Gandhi started writing the film, Irrfan Khan was supposed to play one of the lead roles. When Khan dropped out of the project after being diagnosed with neuroendocrine tumour that eventually took his life, Sushant Singh Rajput stepped in. Rajput’s death, too, left a deep impact on Gandhi. “Both these deaths have been a profound loss of people I deeply admired, people I looked up to and loved,” he says. “I knew Irrfan as an artist. We had a great exchange of ideas. Sushant, I knew a little more. I could call him a friend. [In] the last six to eight months, our relationship intensified. He was increasingly interested in what I was doing and in working with me.”

Rajput’s death has reignited the nepotism debate. Gandhi identifies himself as an outsider. But what he finds most disheartening is that Bollywood rarely churns out films that start a discourse. “The function of films is not just to provide a drug to escape from reality,” he says. “It is to provide solutions, insights, epiphany and possibilities for a better future, and while at it, of course, engage people.”

Maybe that is why Gandhi, who started his career in entertainment by writing hugely popular shows like *Kyunki... Saas Bhi Kabhi Bahu Thi* and *Kahaani Ghar Ghar Kii* for Balaji Telefilms, set up Memesys Culture Lab with Zain Memon. The lab has been experimenting with different

formats, from virtual reality films like *Yeh Ballet*, to a political board game like *Shasn*, and a political documentary like *An Insignificant Man*. Gandhi calls his lab a parallel universe, wherein he is trying to create a world where a tiny bubble like Bollywood remains just that, instead of becoming this mega industry that hogs all limelight.

“It may happen in five or 10 years or it may take my whole life or the

next generation, but that is the vision I am interested in,” he says, “creating something that is so profound, so progressive, so constantly changing, so evolving, so scientific, so well-intended towards making a better world that it will make this tiny little bubble completely irrelevant.”

Having grown up in a Mumbai chawl, where many resources were difficult to come by, the only thing easily available to him was knowl-

edge. “I lived in a completely different environment from the one I am living in now,” he said. “I was made to understand at a very early age that knowledge is free and it was mine to inherit, and I went aggressively after it.” He had a questioning mind, and his mother encouraged it. “At 13, I started my philosophical journey pretty aggressively by attending every philosophical and spiritual service that I could find around me,” he said.

“I ALWAYS LOOK FOR PEOPLE WHO MATCH MY INTELLECTUAL CURIOSITY, WHOSE JOURNEY OVERLAPS WITH MY JOURNEY OF SEEKING THE MEANING OF LIFE.”

“It taught me philosophy, and I decided to drop out of formal education and design my own curriculum because I could not find a single formal education (syllabus) that catered to my requirements.”

By the time he was 17, he had charted out his educational journey that was replete with learning from different scriptures, societies, science and maths. That may be the reason why his lab is populated with people from diverse backgrounds. One of its upcoming projects is a science fiction show for Disney+ Hotstar, tentatively titled *OK Computer*. Its makers are a diverse duo—while Pooja Shetty is an architect and designer who has earlier worked for UN-Habitat’s low-cost housing project in Iraq, Neil Pagedar is a writer and filmmaker who has worked on Films Division’s documentaries.

“I always look for people who match my intellectual curiosity, whose journey overlaps with my journey of seeking the meaning of life,” says Gandhi. “In one of my recent posts, I wrote that seeker(s) of meaning will not find meaning but they do find each other and that’s really just the case. I have been very fortunate in finding the collaborators that I have found and [am] also fortunate that we have managed to stay together all these years.”

MYSTERIES AND MYTHS

(Clockwise from top left) *Emergence*, *Ship of Theseus* and *Tumbbad*

Eliot, you were so accurate

2019 was a bad year for me. Instagram seemed to agree that 2019 sucked for the world in general, too. I was looking forward to 2020, thinking that magically 2020 will bring with it glad tidings. Instead, the year kicked off with an attack by masked goons on the JNU campus and riots in Delhi, and was soon enveloped in a Corona-related dystopia.

Some weeks ago I couldn't bear it anymore. I just wanted to go away from this dismal reality to a different reality. To a world not perfect, but one not so devoid (seemingly) of any public 'good'.

I wanted comfort from someone wiser; someone who knew about the trials and tribulations of human life; someone who would tell me that ultimately the good in us, humans, triumphs.

I turned to George Eliot. She had a... yes, she. Eliot was a woman. Her name was Mary Ann Evans and she wrote under a pseudonym. She had a deliciously wry eye with which to observe human flaws and failings and an empathetic understanding of human nature. I picked up *Middlemarch*, and began to read the sprawling Victorian novel touted as her greatest work.

Set in a provincial Victorian town, the novel is woven around the lives of Dorothea and Lydgate and their ill-matched marriages. But what brings the novel to life are the other characters who breathe relatable life into the story—even 148 years after its publication. I was soon lost in the tapestry of Eliot's world and captured by how many of her observations were so accurate in describing our world.

"Women were expected to have weak opinions; but the great safeguard of society and of domestic life was that opinions were not acted on. Sane people did what their neighbours did, so that if any lunatics were at large, one might know and avoid them."

Who can say this isn't an apt critique of our own 'middle class mentality'?

Or, take this comment on public opinion:

"But this vague conviction of indeterminable guilt... had for the general mind all the superior

power of mystery over fact. Everybody liked better to conjecture how the thing was, than simply know it; for conjecture soon became more confident than knowledge, and had a more liberal allowance for the incompatible." This seems like a description of public opinion around Sushant Singh Rajput's death and the numerous conspiracy theories it has spawned.

But, perhaps, it was the different fates, different disappointments and different failures of each of the characters that in a strange way assuaged so many of my own anxieties. Dorothea's failed first marriage made me forgive myself for my own love-life mistakes. Her happy second marriage to the man she loved made me believe that finding both love and peace was possible.

Lydgate's failed marriage I took as a lesson and his own anxiety about his career made me look kindly upon my own career achievements. Mary Garth's fortitude gave me strength and Mr Farebrother's stoicism served as counsel. Rosamond Vincy's shallow, remorseless, callousness helped me understand a deep pain from my past, and Celia's practicality made me think I should cultivate some myself.

Bulstrode's past made me think of how weak humans really are, and Dorothea's sheer goodness and resolve made me feel that there is something about our humanity that yet redeems us. But, really, what proved to be most affirming for me were Eliot's sweeping but poetic words about what really redeems the human civilisation; the closing lines of the book:

"...For the growing good of the world is partly dependent on unhistoric acts; and that things are not so ill with you and me as they might have been, is half owing to the number who lived faithfully a hidden life, and rest in unvisited tombs."

And so may the unrecognised goodness of the hidden faithful triumph; for (to recall Yeats) the rough beast that was slouching towards Bethlehem may have been born.

The writer is an award-winning Bollywood actor and sometime writer and social commentator.

RESPONSIBLE JOURNALISM

BEGINS WITH CHOOSING THE RIGHT SCHOOL

INVITING APPLICATIONS FOR POSTGRADUATE DIPLOMA IN JOURNALISM.
SPECIALISATION: (i) PRINT / DIGITAL (ii) BROADCAST / DIGITAL

MASCOM, launched by the 132-year-old Malayala Manorama group in 2002, is an acknowledged centre of excellence for journalism in India. The course at MASCOM introduces students to the world of cutting-edge journalism through meticulously designed modules.

As part of the curriculum, students get hands-on experience in news-gathering and bring out weekly lab papers and news bulletins.

While learning to create content for print media is the primary focus for **Print/Digital** specialisation, **Broadcast/Digital** concentrates on television news. The digital modules which are common

to both the specialisations train students to produce content for online media.

Along with exposure to state-of-the-art technology employed at Malayala Manorama, MASCOM has expert faculty with national and international work experience. Facilities at MASCOM include cameras, digital newsroom, television studio and post-production facilities. Student workstations have dedicated computers with broadband connectivity.

Classes will be held online until Government permits regular classes

ELIGIBILITY

Graduates in any discipline and students awaiting degree results may apply. Selection will be based on marks scored in qualifying examinations, write-ups and an online interview.

IMPORTANT DATES

Deadline for receiving completed application: **September 5, 2020**

Classes Begin: **October 2020**

A JUGALBANDI OF MINDS

Bandish Bandits employs music, tradition and love to tell a contemporary story

BY PRIYANKA BHADANI

Ever since they first met on the sets of *Barfi!* (2012) as assistant directors, Amritpal Singh Bindra and Anand Tiwari dreamt of collaborating on a show that would capture young love in all its glory and agony. “A story that was fun and young,” says Bindra. “That spoke about the conflicts that young [lovers] often face in their families.”

That is how *Bandish Bandits* on Amazon Prime Video came to be, with Bindra as executive producer and Tiwari as director. Apart from the duo, the show has two other writers, Adhir Bhat and Lara Chandni.

Bandish Bandits could be a first on a few counts. It is the first Indian web series to have music at its core. It also marks the digital debut of the composer trio Shankar-Ehsaan-Loy and brings together acting stalwarts Naseeruddin Shah, Rajesh Tailang, Atul Kulkarni and Sheeba Chaddha, with two new faces—Ritwik Bhowmik and Shreya Chaudhry—as leads.

The 10-episode series starts with

an interesting premise that juxtaposes Hindustani classical music and pop music in its storyline quite convincingly. Radhe (Ritwik), a singing prodigy from the Rathod *gharana* of Jodhpur, is torn between staying true to his legacy and helping his beloved—Tamanna (Shreya), a pop sensation—achieve the stardom she has always dreamt of.

“I have absolutely no background

“THE DIGITAL SPACE GIVES AN OPPORTUNITY TO A WRITER TO CREATE A WORLD THAT ISN’T VERY SINGULAR.”

—Amritpal Singh Bindra, producer

FINE BLEND
Ritwik Bhowmik in a still from *Bandish Bandits*; (inset) Anand Tiwari and Amritpal Singh Bindra

in music. In fact, I didn’t even like classical music,” says Bindra. “Hence, it was quite an interesting journey for us to write a show on music.”

While music is usually employed to reflect inner conflicts, Bindra and Tiwari wanted to focus more on the external conflicts that young lovers face. “We have stopped talking about the external conflicts,” says Tiwari. “There is, of course, a lot of internal conflict. But there is as much of external conflict in the lives of our two protagonists.”

And while the two main characters are representatives of two very different mindsets that prevail in our country, Tiwari says, “the interesting part is that both are truly Indian—one traditional and one popular.”

To understand the voices and choices of the youth, Bindra and Tiwari interacted with youth at the location in Rajasthan instead of relying on their own feelings while writing the show. “We don’t sit in Bandra West or Andheri West and think that

this is how we feel and this is how the story should be,” says Tiwari.

Though the love story’s arc seems a bit stretched, the makers have beautifully tapped into life in Rajasthan. It is, however, the music that saves the show from sinking. With original compositions by Shankar-Ehsaan-Loy, songs like *Virah*, *Lab Par Aaye* and *Garaj Garaj* (in two versions) elevate the show. What also works is the in-depth portrayal of some traditions followed in *gharanas*.

For instance, in the second episode, titled *Shuddhikaran*, Radhe has to take a strenuous musical test to prove his mettle as a singer and as a sign of penance. These audience hooks came out of the research. “We spoke to a lot of musicians, including classical musicians, pop musicians and young playback singers to understand their world,” says Bindra.

“Besides, we had music consultants to guide us through the show.”

They worked closely with the show’s music supervisor Akshat Parikh, a disciple of Pandit Jasraj, YouTuber Anuja Kamat and Aditya Oke, who was credited for the show’s music arrangement and classical music coordination. The musician Shankar Mahadevan guided them to a lot of people, says Bindra.

Tiwari, who directed the much-appreciated Netflix original film *Love Per Square Foot*, and Bindra took almost two and a half years to create *Bandish Bandits*. All that hard work and patience paid off when the show was lauded by music aficionados.

They had also worked together on *Bang Baaja Baaraat* (2015), one of India’s initial web shows. “It has only been five years, but my God, look at how the [digital] landscape has

changed,” says Bindra. “There has, of course, been the physical transformation in the scope, scale and size, with big players coming in and giving our shows a global platform. The other big change that it has brought is giving writers an amazing experience. We often say that film is a director’s medium and theatre, an actor’s. I really think that the digital space is a writer’s medium. It gives an opportunity to a writer to create a world that isn’t very singular.”

Bindra had to share the link of *Bang Baaja Baaraat* to make people aware of its existence. A few thought it was a film that did not make the cut and was therefore turned into a web series. That stigma, says Bindra, has reduced drastically in the last two years. The lines have blurred, he says, and that is a thing for people like him to rejoice about. ■

INFOCUS

SYMBIOSIS MEDICAL COLLEGE FOR WOMEN (SMCW) BRINGING INDIAN WOMEN TO THE FOREFRONT OF MEDICINE

The Symbiosis Medical College for Women (SMCW) is the brainchild of Prof. Dr. S.B. Mujumdar, Founder and Chancellor of Symbiosis International (Deemed University). Inspired by the biographic movie about India’s first lady doctor, Anandibai Joshi, the idea of establishing a medical college, exclusively for women was born.

Symbiosis has established this college exclusively for women with an annual intake of 150 and has also launched the Anandi Gopal Scholarship Scheme (full fee waiver for five students for the entire M.B.B.S programme) which will be awarded purely on merit. SMCW will be the first medical college in the country to offer free medical education to five meritorious students under the Anandi Gopal Scholarship scheme. SMCW is located on the scenic campus of the University at Lavale, Pune and has more than the

required infrastructure with admirable academic facilities, excellent residential quarters and student hostels. The College has a well-equipped library with an essential array of national and international reference books, medical journals, textbooks and online databases. The faculty at SMCW and SUHRC have been drawn from the best across the country. Few of them have also been certified by international bodies.

Symbiosis University Hospital and Research Centre (SUHRC) is a teaching hospital, currently a 300 bedded hospital (scalable to 900 beds), attached to the medical college. It provides top-quality clinical services, which are protocol-driven and evidence based. SUHRC has state-of-the-art infrastructure, the latest equipment and medical facilities. Besides Medicine, Surgery, Obstetrics & Gynaecology, SUHRC also has other departments viz. Paediatrics with Neonatology (including an NICU), Orthopaedics, ENT, Ophthalmology, Gastroenterology, Urology, Nephrology with Dialysis beds, Pulmonology (chest medicine), Critical Care Medicine, a full-fledged Pathology Lab and a Blood Bank. There is also a Cardiology Dept. (with a Cath Lab). There are 21 ICU beds with 6 High Dependency Unit (HDU) beds. SUHRC has 5 large Operation Theatres, which cater to all the surgical disciplines, including one exclusively for Obstetrics & Gynaecology. All theatres are ‘modular’ with 2-way data

transfer facilities. SUHRC provides out-patient and in-patient care in all specialities, including super-speciality services.

The presence of sister institutes within the University campus like the Symbiosis Institute of Technology (SIT), Symbiosis School of Biological Sciences (SSBS) and Research Centres such as Symbiosis Centre for Stem Cell Research (SCSCR), Symbiosis Centre for Medical Image Analysis (SCMIA), Symbiosis Centre for Applied Artificial Intelligence (SCAAI), Symbiosis Centre for Behavioural Studies (SCBS), Symbiosis Centre for Nanoscience and Nanotechnology (SCNN), Symbiosis Centre for Waste Resource Management (SCWRM) and Symbiosis Centre for Emotional Wellbeing (SCEW) will assist in the strong focus on academics and research. Girl students of SMCW during the studentship will adopt 10 families under the Symbiosis Community Outreach Programme & Extension (SCOPE) activities and SMCW will endeavour to create caring, compassionate and ethical female doctors.

Dr. M.S. Shejul, Registrar, SIU

Time to pause

At a webinar organised by the JSW group, lyricist and screenwriter **Pra-soon Joshi** talked about how spirituality, art, culture and music have now become central to our lives. According

to him, the pandemic has given us a chance to ponder on what is really important in life. "Our lives were going on autopilot," he said. "We were constantly driven by a sense of dynamism and movement without ever pausing to think whether it was meaningful." Other speakers at the webinar, comprising two sessions on August 14 and 15, included writer Amish, American epidemiologist Dr Larry Brilliant and Pulitzer-winning political commentator, Thomas Friedman.

Lucky charm

The teaser of national award-winning actor **Keerthy Suresh's** next, *Good Luck Sakhi*, has been making waves on social media since its release on Independence Day. The woman-centric film directed by Nagesh Kukunoor will release in Telugu, Tamil and Malayalam and is about how a village woman becomes a professional shooter. Actors Aadhi Pinishetty and Jagapathi Babu will feature in prominent roles in the film.

AGHOSH VAISHNAV

CHUNKY PANDEY, actor

Staying evergreen

Chunky Pandey made his digital debut with the recently-released second season of *Abhay* on Zee5. After working in the industry for over three decades, the actor says he is happy with where he is now. Here, he talks about playing a villain in the series, what it was like to be without projects in the 1990s and daughter Ananya Pandey being trolled.

Q\ How would you describe your character, Harsh, in *Abhay 2*?

A This is not a person you would want to meet anytime soon. He is a three-dimensional character, [seemingly] a soft-spoken and humble person, always nice to people. But when he changes, the change is drastic. I really enjoyed playing this character. He seems to have come straight out of Dr Jekyll and Mr Hyde.

Q\ You have spoken about not getting work after the release of *Aankhen* (1993). How do you look back at that phase?

A After *Aankhen*, the only film I did was *Teesra Kaun* (1994) with Mithun Chakraborty. Then, I went off to Bangladesh. I just was not getting any work. That was the phase when films were shifting [their focus] from multi-starrers to solo heroes. When I came back in 2000 upon the insistence of my wife, I realised that after staying away for so long, a whole generation had

forgotten me.

Q\ Many actors from your generation, like Govinda, have spoken about not being able to find work today. Has it been easy for you?

A Govinda is a superstar. People would be happy to cast him. But is he ready to do the work that he is being offered? As for me, I decided to go after character roles. Somewhere in my heart, I knew there was no space for me as a second hero. My career started with people like Shakti Kapoor, Gulshan Grover and Kader Khan. These people would do great comedies as well as strong negative roles. They have always inspired me and now I am getting a chance to do what they did.

Q\ Your daughter Ananya is often trolled when the question of nepotism comes up.

A I know her name keeps coming up. But as a parent I keep telling her, 'You know how you got the film. As far as you know what you have done, these things should not affect you.' When she was young, I thought that she would become a doctor as both my parents were doctors, but she chose to be an actor. I am happy that she has been accepted.

The inner journey

Sankalp Rawal's short film, *Samskara*, shot in a split-screen format with hardly any dialogues, is now available on Disney+Hotstar. The critically-acclaimed film starring Namit Das and Naman Jain is told almost entirely through sound, movement and design. It premiered at festivals like the Cannes Film Festival, Vancouver Asian Film Festival and Kansas Film Festival and explores ancient yogic ideas of how we form inner structures and algorithms through our life experiences.

Finishing touch

After conquering Hollywood, **Priyanka Chopra** is all set to scale another peak. She announced that her memoir, *Unfinished*, is ready and soon to be published by Penguin Random House. "Finished," she tweeted. "What an amazing feeling seeing these pages printed on paper for the first time." The book is reportedly a collection of personal essays, stories and observations.

Prime time embarrassment

I was a child of television. Unlike many journalists who migrated from newspapers to the visual media, my first master's degree was in film and television production and my first job was as a producer-reporter-sound mixer in television news.

This background is to explain that unlike others, I have never been contemptuous about television. I loved the grammar of pictures and their capacity to tell an immediate, intimate, powerful story.

But two decades later, storytelling is dead in television news. And all that remains is variants of talk—some polite, some shrill, almost all of it banal and some of it positively injurious to the health of our democracy.

Whether it is the way the tragic death of Sushant Singh Rajput or the fatal heart attack of Congress spokesperson Rajiv Tyagi shortly after he attended a raucous television debate has been reported, the chatterbox is now way more lethal than a mere idiot box.

The problem is not just the coarsening of conversation or the political partisanship. It's the unleashing of vigilante justice. Today there is little difference in an insane, blatantly fake forward you receive on WhatsApp and the content you may consume on television. And the uncles and aunties in your family forums believe both to be accurate. If the last distinguishing feature of mainstream media—challenged more and more by digital platforms and social networks—was editorial gatekeeping, that distinction no longer exists.

We debate toxicity and hate-mongering on our online platforms. How often do we step back and question the 9pm news? Whether it is subliminal hatred against Muslims, pronouncements of

guilt and innocence against individuals, pseudo-patriotism or downright slander, prime time is now a pathetic spectacle.

Funny thing is wherever I go, people crib non-stop about the quality of news media. 'Tamasha' is a word frequently used for my erstwhile medium. Everyone recognises that there is barely any reportage in television newsrooms. But even the quality of talk is suspect. It's not as if viewers enjoy seeing the same faces rotate across studios, or in the age of Covid-19, on Zoom. The most common thing I hear about TV news is how it is chasing TRPs. But

no one stops to consider what a TRP (television rating point) actually is. A TRP is all of you, all of us—the audience. It is in your power to reject or accept a certain kind of news media.

Now, of course, the other big problem in an increasingly polarised polity is that of viewers seeking confirmation

bias. In other words, if my programme does not confirm your political bias, you will call me partisan. Those of us who remain adamantly free from either camp get to face this even more as we get attacked by all sides.

But keeping aside political affiliations—real and imagined—for the moment, wouldn't you want a news show that does not embarrass you, that is robustly researched and reported and that you watch for information, not for mindless entertainment?

As somebody who has migrated to the digital world from television, I know this: as a young person growing up today, I would never have become a broadcast journalist if these were the examples before me.

The future of journalism lies not just with its practitioners. It lies with we, the people—the audience.

Choose wisely.
